An American Health Dilemma W. Michael

Byrd, Linda A. Clayton, 2001-12-21 First published in 2002 *An American Health Dilemma* is the story of medicine in the United States from the perspective of people who were consistently officially mistreated, abused or neglected by the Western medical tradition and the US health care system. It is also the compelling story of African Americans fighting to participate fully in the health care professions in the face of racism and the increased power of health corporations and HMOs. This tour de force of research on the relationship between race, medicine and health care in the United States is an extraordinary achievement by two of the leading lights in the field of public health. Ten years out, it is finally updated with a new third volume taking the story up to the present and beyond, remaining the premiere and only reference on black public health and the history of African American medicine on the market today. No one who is concerned with American race relations, with access to and quality of health care or with justice and equality for humankind can afford to miss this powerful resource.

A History of Modern Psychology in Context Wade Pickren, Alexandra Rutherford, 2010-02-19 In *A History of Modern Psychology in Context* the authors resist the traditional storylines of great achievements by eminent people or schools of thought that rise and fall in the wake of scientific progress. Instead, psychology is portrayed as a network of scientific and professional practices embedded in specific contexts. The narrative is informed by three key concepts: indigenization, reflexivity and social constructionism, and by the fascinating interplay between disciplinary psychology and everyday psychology.
