Evolution Of Culture An Interdisciplinary View:

Handbook of Social Psychology John DeLamater, 2006-11-24 Psychology focusing on processes that occur inside the individual and Sociology focusing on social collectives and social institutions come together in Social Psychology to explore the interface between the two fields The core concerns of social psychology include the impact of one individual on another the impact of a group on its individual members the impact of individuals on the groups in which they participate the impact of one group on another This book is a successor to Social Psychology Social Perspectives and Sociological Perspectives in Social Psychology The current text expands on previous handbooks in social psychology by including recent developments in theory and research and comprehensive coverage of significant theoretical perspectives **Die Theorie der sexuellen Selektion und ihre Bedeutung für die Evolution menschlicher Merkmale** Uta Skamel, 2003-03-05 **The Evolution of Culture** Robin Ian MacDonald Dunbar, Chris Knight, Camilla Power, 1999 This book explores the ways in which contemporary evolutionary thinking might inform the study of the peculiarly human phenomenon of symbolic culture including language ritual religion religion and art It draws together contributions from biologists linguists anthropologists and archaeologists in order to establish common ground where collaboration and interaction will be especially productive and challenging in the study of those fundamental aspects of our biology that makes us human Multidisciplinary An evolutionary approach to culture **Origins of Psychopathology** Horacio Fabrega (Jr.), 2002 What are the origins of human psychopathology Is mental illness a relatively recent phenomenon or has it been with us throughout evolution In Origins of Psychopathology Horacio Fabrega Jr employs principles of evolutionary biology to better understand the significance of mental illness He explores whether what psychiatry has categorized as mental disorders could have existed during earlier phases of human evolution Fabrega approaches the prominent features of mental disorders as adaptive responses to the environment and life's circumstances which in turn can only be understood in the context of our evolutionary past Taking his cue from theoretical issues raised by research into primate behavior and early hominid evolution he poses the question What if any aspects of mental illness are rooted in our evolution Does mental illness occur in primates and other animals and if so what does this tell us about mental illness in human evolution How has mental illness played an adaptive role How has the development of language and higher cognitive functions affected characteristics of psychopathology Fabrega synthesizes insights from both the clinical and the evolutionary points of view This facet of psychopathology which involves its origins and manifestations viewed across the expanse of human evolution has until now been largely neglected in psychiatric education theory and practice **Gewalt und Opfer** Anton Bierl, Wolfgang Braungart, 2010-04-23 Die Beiträge des Autorenkolloquiums am Zentrum für interdisziplinäre Forschung der Universität Bielefeld Nov 2007 setzen sich intensiv mit Walter Burkert und seinem Werk auseinander Der international hoch angesehene Geograph hat in seinen Epochenmachenden Studien die um die Ursprünge menschlichen Zusammenlebens in Riten um Opfer Schuld und grausame Todesszenarien

kreisen Fragestellungen der biologischen Verhaltensforschung aufgenommen und über die Altertums und Religionswissenschaften hinaus eine große intellektuelle Wirkung entfaltet *Ritual Communication* Gunter Senft, Ellen B. Basso, 2020-05-15 *Ritual Communication* examines how people create and express meaning through verbal and non verbal ritual. Ritual communication extends beyond collective religious expression. It is an intrinsic part of everyday interactions, ceremonies, theatrical performances, shamanic chants, political demonstrations and rites of passage. Despite being largely formulaic and repetitive, ritual communication is a highly participative and self oriented process. The ritual is shaped by time, space and the individual body as well as by language, ideologies, local aesthetics, contexts of use and relations among participants. *Ritual Communication* draws on a wide range of contemporary cultures from Africa, America, Asia and the Pacific to present a rich and diverse study for students and scholars of anthropology, sociology and sociolinguistics. Evolutionary Aesthetics Eckart Voland, Karl Grammer, 2003-06-12 Evolutionary aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life. The hypothesis is both in the area of natural beauty and in sexuality with regard to landscape preferences but also in the area of artificial beauty, i.e. in art and design, that beauty opens up fitness opportunities while ugliness holds fitness risks. In this book, this adaptive view of aesthetics is developed theoretically, presented on the basis of numerous examples and its consequences for evolutionary anthropology are illuminated. **Handbook of Bowen Family Systems Theory and Research Methods** Mignonette N. Keller, Robert J. Noone, 2019-12-18 The *Handbook of Bowen Family Systems Theory and Research Methods* presents innovative approaches on a range of issues inherent in family research and discusses the links between theory, data collection and data analysis based on Bowen family systems theory. This multi-authored volume discusses core issues within family systems theory including anxiety, stress, emotional cutoff, differentiation of self, multigenerational transmission process and nuclear family emotional process. Chapters also examine related constructs in the research literature such as adaptation, resilience, social support, social networks and intergenerational family relations. Readers will be able to view theoretical and methodological issues from the perspective of Bowen theory and develop a clearer knowledge of ways to navigate the challenges faced when studying individual, familial and societal problems. An essential resource for clinicians and researchers in the social and natural sciences, the *Handbook of Bowen Family Systems Theory and Research Methods* provides a comprehensive framework for understanding the application of Bowen theory to family practice and family research. Human Characteristics Preben Bertelsen, Henrik Høgh-Olesen, Jan Tønnesvang, 2009-01-23 Every once in a while we have to reconsider the perennial questions concerning human nature. What are the special human behaviours, social practices and psychological structures that make us particularly human? The field of evolution psychology and cognitive science is the most expanding interdisciplinary area of this field for the time being, uniting different sciences under the same evolutionary paradigm and keeping them occupied by the same

eternal questions stated above Relevant data and theoretical considerations are piling up but an overview is needed To facilitate this a large inter disciplinary conference entitled Human Mind Human Kind was held at Aarhus University Denmark The studies fall into three well defined sections 1 Evolution and Cognition Comparative and Developmental Perspectives 2 Human Sociality Morality and Religiosity 3 Human Sexuality and Mating Strategies Specifying the differences between our own species and the rest of the animal world always provokes debate But these demarcations simply have to be drawn once and again They focus attention and stimulate research exactly because they provoke and challenge other researchers to take up the glove and prove us wrong

The Mating Mind Geoffrey Miller, 2011-12-21 At once a pioneering study of evolution and an accessible and lively reading experience a book that offers the most convincing and radical explanation for how and why the human mind evolved Consciousness morality creativity language and art these are the traits that make us human Scientists have traditionally explained these qualities as merely a side effect of surplus brain size but Miller argues that they were sexual attractors not side effects He bases his argument on Darwin s theory of sexual selection which until now has played second fiddle to Darwin s theory of natural selection and draws on ideas and research from a wide range of fields including psychology economics history and pop culture Witty powerfully argued and continually thought provoking The Mating Mind is a landmark in our understanding of our own species

Natural Corporate Management William C. Frederick, 2017-09-08 This groundbreaking new book by business scholar William C Frederick presents an innovative exciting even revolutionary view of corporate management and the challenges it confronts in today s world The author proposes a management paradigm shift transforming the way corporations do business Management scholarship and research may well be rechanneled from current orientations to new models concepts and theories of what it takes to manage corporations in a planetary world confronting climate change energy crises and securing the well being of all global citizens Natural Corporate Management NCM is an awareness and an acceptance by the managers of today s business corporations of the close functional linkage between natural forces and human economic choices NCM is not a set of techniques or methods but is a growing consciousness by managers of the presence and influence of nature in all managerial decisions The book s central theme is that business and nature are locked into an evolutionary partnership that defines all aspects of corporate management including decisions policy goal seeking organizational design workplace behavior and productive operations This partnership of Nature and Nurture yields economic social and ecological dividends for corporations their stakeholders and the global community An Evolutionary Cascade depicts the various phases of evolutionary change physical organic genetic human neurological symbolic beginning with the Big Bang origin of the Universe and continuing to modern times These evolutionary events collectively influence the operational activities of all business firms A Natural Theory of the Firm summarizes the NCM approach as well as the mind set of corporate managers and the bio socio economic consequences of their decisions This theoretically innovative book proposes an agenda of corporate actions to promote long term

sustainability and economic well being of business its stakeholders and planetary citizens everywhere It will be essential reading for managers and researchers at all levels who wish to engage seriously with the challenges of organic life and its long term sustainability

The Human Connectome Kostas N. Fountoulakis,2022-12-08 This book constitutes the end result of 20 years long effort that goes beyond a Psychiatrist s standard clinical training and education even that of a Psychiatrist that follows an academic career Trying to explain how the human mind works is hard and the heterogeneity of the audience make the attempt even more difficult There is a conceptual difference between the words brain and mind and this makes the effort even more difficult since the present book tries to preserve the strict scientific approach concerning all the topics discussed The work elaborates and tries to answer questions frequently phrased by audiences in teaching classes and in conferences and does not avoid any question In order to achieve this goal it is

structured in chapters all the way from the molecule and the cell to consciousness and free will The book targets mainly the mental health care professionals as an audience and to a lesser extend the other health professionals It is written according to the author s view concerning the training and educational needs of Psychiatrists and Psychologists and to a lesser degree of Neurologists and Neuroscientists in general

Being Religious Mladen Turk,2013-07-12 What makes us religious What is religion This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion In *Being Religious* Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup Our religious behaviors can influence our relationship towards each other and towards our environment in significant ways He shows how some aspects of complex religious behaviors can be understood better in light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize

Introducing Religion Willi Braun,Russell T. McCutcheon,2016-04-08 The study of religion encompasses ordinary human social practice and is not limited to the extraordinary or divine *Introducing Religion* brings together leading international scholars in the field of religious studies to examine religion as integral to everyday social practice The book establishes a theoretical framework for the study of religion to analyse prayer ritual science morality and politics in relation to the world s major religions It will be of interest to students of theory and method in religious studies seeking a clear introduction to the multifaceted nature of religion

Sensing the Divine Michael N. Marsh,2021-08-10 This book proposes another unique basis for the origins of religion from disturbances in brain function It proposes the novel idea that near death and out of body experiences ND OBE engendered a sense of the divine in ancient man As the author points out key aspects of ND OBE are thematic of all later established religions These include journeys to heaven sightings of brightly lit godlike figures and dead people now alive Thus ND OBE could be the originating source of these spiritual motifs To this the author adds a fourth factor various brain influences contribute to or modulate ND OBE Such cognate neurological disorders include REM sleep intrusions sleep paralysis narcolepsy and the Guillain Barr syndrome Errors due to aberrant switching between key neural control centers disrupt critical state boundaries between consciousness and dreaming This may induce NDE Thus in this state subjects temporarily fail to understand where they are undergo loss of self and detached from the world They imagine a union with Gods Here then is the biological basis of ineffability Ancient humans gained beliefs about the supernatural through day to day existence This book argues that near

death experiences and cognate neurological conditions some genetically determined could have facilitated even augmented such beliefs Hence in configuring another realm of spiritual experience beyond the known environment these neurological possibilities offer effective traction Human Origins Camilla Power,Morna Finnegan,Hilary Callan,2016-12-01 Human Origins brings together new thinking by social anthropologists and other scholars on the evolution of human culture and society No other discipline has more relevant expertise to consider the emergence of humans as the symbolic species Yet social anthropologists have been conspicuously absent from debates about the origins of modern humans These contributions explore why that is and how social anthropology can shed light on early kinship and economic relations gender politics ritual cosmology ethnobiology medicine and the evolution of language *Concepts* Paul Dehn Carleton,2004 Concepts is a search for theism s roots coined prototheism a science of religion Its notion is Belief in God is a misconception of the Life Urge emerging from deep in human nature Concepts traces Life s trajectory from Earth s origin to consciousness to today s runaway material culture Holistic Anthropology David Parkin,Stanley Ulijaszek,2011 Given the broad reach of anthropology as the science of humankind there are times when the subject fragments into specialisms and times when there is rapprochement Rather than just seeing them as reactions to each other it is perhaps better to say that both tendencies co exist and that it is very much a matter of perspective as to which is dominant at any moment The perspective adopted by the contributors to this volume is that some anthropologists have over the last decade or so been paying considerable attention to developments in the study of social and biological evolution and of material culture and that this has brought social material cultural and biological anthropologists closer to each other and closer to allied disciplines such as archaeology and psychology A more eclectic anthropology once characteristic of an earlier age is thus re emerging The new holism does not result from the merging of sharply distinguished disciplines but from among anthropologists themselves who see social organization as fundamentally a problem of human ecology and from that of material and mental creativity human biology and the co evolution of society and culture It is part of a wider interest beyond anthropology in the origins and rationale of human activities claims and beliefs and draws on inferential or speculative reasoning as well as hard evidence The book argues that while usefully borrowing from other subjects all such reasoning must be grounded in prolonged intensive and linguistically informed fieldwork and comparison
