Evolutionary Analysis Scott Freeman, Jon C. Herron, 2001
 Designed to help readers learn how to think like evolutionary biologists this 4 color book approaches evolutionary biology as a dynamic field of inquiry and as a process Using a theme based approach it illustrates the interplay between theory observation testing and interpretation It offers commentary on strengths and weaknesses of data sets gives detailed examples rather than a broad synoptic approach includes many data graphics and boxes regarding both sides of controversies Introduces each major organizing theme in evolution through a question e.g. How has HIV become drug resistant Why did the dinosaurs after dominating the land vertebrates for 150 million years suddenly go extinct Are humans more closely related to gorillas or to chimpanzees Focuses on many applied reader relevant topics e.g. evolution and human health the evolution of senescence sexual selection social behavior eugenics and biodiversity and conservation Then develops the strategies that evolutionary biologists use for finding an answers to such questions Then considers the observations and experiments that test the predictions made by competing hypotheses and discusses how the data are interpreted For anyone interested in human evolution including those working in human and animal health care environmental management and conservation primary and secondary education science journalism and biological and medical research

How Science Works: Evolution R. John Ellis, 2010-01-18 Evolution is just a theory isn't it What is a scientific theory anyway Don't scientists prove things What is the difference between a fact a hypothesis and a theory in science How does scientific thinking differ from religious thinking Why are most leading scientists atheists Are science and religion compatible Why are there so many different religious beliefs but only one science What is the evidence for evolution Why does evolution occur If you are interested in any of these questions and have some knowledge of biology this book is for you

Evolution Algebras and Their Applications Jianjun Paul Tian, 2008 Behind genetics and Markov chains there is an intrinsic algebraic structure It is defined as a type of new algebra as evolution algebra This concept lies between algebras and dynamical systems Algebraically evolution algebras are non associative Banach algebras dynamically they represent discrete dynamical systems Evolution algebras have many connections with other mathematical fields including graph theory group theory stochastic processes dynamical systems knot theory 3 manifolds and the study of the Ihara Selberg zeta function In this volume the foundation of evolution algebra theory and applications in non Mendelian genetics and Markov chains is developed with pointers to some further research topics
