Feeling blue

You can tell how healthy these birds are by looking at their feet! Sooty noddies is a species of seabird. The birds get coloured compounds (called carotenoids) from the fish that they eat. These substances become concentrated in their feet, which makes them blue. The better their diet and the healthier they are, the bluer their feet

Advances in Help-Seeking Research and Applications Stuart A. Karabenick, Minna Puustinen, 2013-06-01 Research on help seeking has primarily focused on classrooms interactions that consist primarily of students asking teachers and peers for help The rapid emergence of information and communications technologies and interactive learning environments however requires expanding the help seeking landscape and rethinking such critical theoretical issues as the distinction between help seeking and information search and whether help seeking is inevitably a social self regulated learning strategy There is also the need to focus attention on help seeking in the broader learning enterprise which includes its role in the collaboration process how to support adaptive rather than the over or under reliance on help seeking as well as to scaffold help seeking skills that render the process more efficient and useful To examine these and other issues the present volume assembled contributions from internationally recognized scholars and researchers to capture the state of the art and to anticipate future developments in this expanding field Its relevance extends to anyone attempting to understand the role of technology in education including educational researchers and teachers who do now or who expect to use technology to support instruction and the rapidly expanding numbers of those developing new technological applications *The Software Encyclopedia*, 1986

Active Learning in College Science Joel J. Mintzes,Emily M. Walter,2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman s 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV

Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book's final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of naïve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for
