Basic Advanced Prehospital Trauma Life Support Military Edition:

U.S. Army Special Warfare Medical Group SPECIAL OPERATIONS COMBAT MEDICAL SKILLS SUSTAINMENT COURSE: Tactical Combat Casualty Care (TCCC) Training For The SOF Advanced Tactical Practitioner (ATP) ,

Scope a USSOCOM's principle function is to prepare SOF to carry out assigned missions. This responsibility is derived from US Code Title 10 Section 167. In addition to organizing training and equipping SOF for unique missions, medical education is fundamental to fulfilling this law. Title 10 explicit responsibilities include development of strategy, doctrine, tactics, conducting specialized courses of medical instruction for commissioned and non-commissioned officers, and monitoring the medical education and professional certification of officers and enlisted personnel. USSOCOM's medical education and certification responsibilities are inherent responsibilities of developing strategy, doctrine, and tactics. b The Commander, United States Special Operations Command (CDRUSSOCOM) has the service-like responsibility of providing joint training and education venues that specialize in the art and science of joint Special Operations and its medical support. These efforts complete the education and training picture within the Department of Defense (DOD). While each of the Services and the joint community provide education and training to fill a particular niche (i.e., naval warfare, air warfare, joint warfare, etc.), the Joint Special Operations Medical Training Center (JSOMTC) within USSOCOM and the Air Force's Pararescue PJ course provides training to fill the medical niche of joint SOF core task requirements. SOF medical training and certification is force-wide, designed to initiate, maintain, and/or enhance medical skills of those SOF medics and non-medics who are required to perform the unique global multi-discipline mission of USSOCOM. Within the parameters of this directive as outlined by first reference Glossary Section III, USSOCOM's primary responsibility is the medical education and training and certification of SOF. A secondary responsibility is the training and education of select DOD interagency and international military personnel in the requirements, capabilities, and limitations of joint special operations organizations. Fostering a mutual understanding ensures the proper application of SOF and the enhancement of joint combined and interagency medical operations. General In support of the Global War On Terrorism (GWOT), Special Operations medical personnel often find themselves providing care for both trauma and non-traumatic medical emergencies beyond the Forward Edge of the Battlefield (FEb) Area Forward Line Of Troops (AFLT) often in non-linear environments that may be far forward of any supporting medical infrastructure. This directive identifies the authority, mission, command relationships, functions, and responsibilities of the United States Special Operations Command as directed under Section 167, Title 10 of US Code to provide SOF medics with the required skill sets. In order to define and administer this SOF Medical skill set, USSOCOM has established a SOF Emergency Medical Services (EMS) State that is administered by the Command Surgeon. Medics who successfully complete the required academic requirements as defined within this directive will thus be known as SOF Advanced Tactical Practitioners (ATP).

SOF Combat Casualty Care Handbook Combined Arms Center , This handbook was previously distributed as a supplement to the Journal of Special

Operations Medicine The realm of special operations forces SOF medicine is a unique and ever changing one that demands specialized training for our joint SOF Managing trauma on today s battlefield presents a dynamic array of challenges where limited resources can be rapidly overwhelmed An austere environment hostile gunfire and delays in casualty evacuation CASEVAC are the norms for the special operations medic The material in this handbook was gleaned from special operations medics operating in the Global War on Terrorism and other operational environments It should not be viewed as a substitute for the professional training and judgment of special operations medics rather it is designed to be a hip pocket reference on the tactics techniques and procedures TTP of SOF relevant tactical combat casualty care Key Lessons Ninety percent of combat loss of life occurs before casualties ever reach a military treatment facility MTF treatment prior to casualty evacuation is vital Litter carries are fundamental for good patient care they prevent further injury and get individuals off target as soon as possible Rehearse manual carry methods prior to deployment Every special operations warfighter should carry a tourniquet and be thoroughly familiar with its application When managing multiple casualties apply the principles of triage in classifying the priority of treatment and evacuation Rehearse and employ all of the mechanics of CASEVAC from the point of injury to the handover at a MTF This handbook provides a number of considerations when employing medical support to SOF in combat The challenges are numerous but the special operations medic must deliver medical care to save Soldiers lives The collection of TTP in this handbook will enhance the medic s ability to determine the optimum method to deliver casualty survival assistance **Journal of Special Operations Medicine** ,2007 Ranger Medic Handbook U.S. Department of Defense,2016-01-19 Historically in warfare the majority of all combat deaths have occurred prior to a casualty ever receiving advanced trauma management The execution of the Ranger mission profile in the Global War on Terrorism and our legacy tasks undoubtedly will increase the number of lethal wounds Ranger leaders can significantly reduce the number of Rangers who die of wounds sustained in combat by simply targeting optimal medical capability in close proximity to the point of wounding Directing casualty response management and evacuation is a Ranger leader task ensuring technical medical competence is a Ranger Medic task A solid foundation has been built for Ranger leaders and medics to be successful in managing casualties in a combat environment The true success of the Ranger Medical Team will be defined by its ability to complete the mission and greatly reduce preventable combat death Rangers value honor and reputation more than their lives and as such will attempt to lay down their own lives in defense of their comrades The Ranger Medic will do no less
