Select Topics of Econophysics Amit Sinha, 2024-11-04 Economics requires understanding and analyzing forces that bring buyers and sellers to a market place who then negotiate exchanges of goods and services based on a mutually agreeable price Economists have their own method of modeling whereby models are first conceived of some notion of economic and financial thinking before being empirically tested and anomalies are then recognized if the observed data is inconsistent with the hypothetical underpinning This is in inherent contradiction with the modeling approaches of physicists who develop their theories principle and laws after observing empirical data The awareness that physics can enlighten the understanding of human behavior and thus economics and the interest of physicists in applying their training and models to understanding the complexities of finance and economics led to the creation of a new field of study appropriately termed as Econophysics Selected Topics on Econophysics is a collection of essays on topics that enhance and enrich our understanding of economic modeling when the same rigor of modelling used by physicists is brought to developing financial and economic theories These articles include discussions on modeling bitcoins stock index modeling using geometric Brownian motion agent based modeling wealth distribution modeling as well as modeling related to fractal regression and chaotic processes This interdisciplinary book will interest researchers graduate students and professionals in the fields of economics finance as well as physics

Recreational Disturbance of Shorebirds in Tropical Asia Priyan Perera, Sumudu Marasinghe, Greg D. Simpson, David Newsome, 2022-09-16 Much of that growing demand for coastal recreation and tourism has focused on countries in South and Southeast Asia in the tourism megaregion that this book refers to as Tropical Asia As such the recreational disturbance of shorebirds in Asia is a serious conservation issue at a time when populations of both migratory and non migratory species of shorebirds are threatened and declining because of the loss of coastal habitat and increased human disturbance Despite global awareness about the impacts that the growth of coastal recreation and tourism across Tropical Asia is likely to be having on threatened and endangered migratory and resident shorebird species of the coastal zones of the East Asian Australasian Flyway less than 3% of the published peer reviewed research into the recreational disturbance of shorebirds addresses coastal zones of Tropical Asia This situation points to a

significant knowledge gap regarding the impacts of human recreation on shorebirds in the Tropical Asian region In contrast almost three quarters of the peer reviewed articles that report recreational disturbance research and management strategies focus on coastal zones in North America 36% Oceania 20% and Europe 20% For those reasons the quantitative systematic literature review and research case study from Sri Lanka reported in this book provide a call to action and recommendations for both management approaches grounded in the international literature and a research agenda that should be implemented in the coastal zones of Tropical Asia *Managing IT in Government, Business & Communities* Gerry Gingrich, 2003-01-01

This guide presents the most current research and findings about the challenges governments around the world are now placing on small business IT entrepreneurs and how they are providing increased resources to support this emphasis Described are how organizations and society rely heavily on virtual technologies for communication and how information management has presented government officials and information resource management practitioners alike with a variety of challenges associated with managing resources and applications in the world economy Topics covered include federal agency intranets concerns and solutions for electronic voting systems adoption using the web for enhanced decision making and the role of the virtual **Designing Management Information Systems** Hans van der Heijden, 2009-01-29

Management information systems MIS produce the information that managers use to make important strategic decisions This book covers the essential managerial skills that are necessary to design these systems In contrast to other books on management information systems this book takes a decidedly managerial perspective It focuses on how managers perceive and respond to information and on their need to use this information to make important decisions The book considers how systems can be designed to combat information overload experienced by managers using such techniques as data aggregation and data visualization Chapters provide an in depth and practical consideration of these topics focusing on the use of information systems for managerial decision making Designing Management Information Systems covers the topics of key performance indicator monitoring and of shortlisting and selecting alternatives from a range of options These are managerial decisions for which MIS are particularly useful and which managers face on a daily basis This is the first book offering practical guidance on how systems should be designed to support these decisions It is written for managers those studying business

management and IT and those developing MIS on behalf of management **Designing Management Information Systems** Johannes Govardus Maria van der Heijden, 2009 Management information systems MIS produce the information that managers use to make important strategic decisions This book takes a decidedly managerial perspective focusing on how people perceive and respond to information and how MIS design can use this information to help managers make better decisions and avoid information overload **Wissenschaftliches Arbeiten und Schreiben** Marcus Oehlrich, 2019-01-07

Wissenschaftliches Schreiben ist unentbehrliches Handwerkszeug f r die akademische Praxis Dennoch wird es an Universit ten und Hochschulen nicht ausreichend vermittelt Dieses Lehrbuch ist praxisorientierter als andere Publikationen und enth lt

neben Beispieltexten und Formulierungshilfen auch Checklisten und Übungsaufgaben zu jedem Schritt. Der Schwerpunkt des Buches liegt auf der Technik des Schreibens; es ist als Übungsbuch angelegt, es hilft typische Fehler zu vermeiden und dokumentiert den Lernfortschritt. Links und Erläuterungen zu den wichtigsten Bibliothekskatalogen, Aufsatzdatenbanken und E-Journals erleichtern die eigene Recherche. Dabei geht das Lehrbuch über eine Anleitung für das Verfassen einer akademischen Abschlussarbeit hinaus und vermittelt grundlegende Fertigkeiten wissenschaftlichen Arbeitens, die auch in der beruflichen Praxis benötigt werden. Im Zentrum eines Hochschulstudiums steht nicht das Auswendiglernen von Fachwissen, sondern die kritische Auseinandersetzung bei der Anwendung dieses Wissens. Für die zweite Auflage wurde das Buch komplett bearbeitet und um einige aktuelle Themenkomplexe erweitert, zum Beispiel zur Plagiatsproblematik oder zur Auswahl von Suchbegriffen bei der Recherche. Mit folgenden Inhalten beschäftigt sich der Autor dieses Lehrbuches zum wissenschaftlichen Arbeiten: insbesondere Wissenschaftstheoretische Grundlagen, Arbeit mit wissenschaftlichen Büchern und Quellen, Literaturrecherche und Bewertung, Zitierregeln und Plagiatsbestimmungen, Gedankenführung und Argumentation, Textgestaltung, Schreibstil und -techniken. Mit seinen vielen Praxisbeispielen hilft das Übungsbuch dabei, typische Fehler zu vermeiden. Es richtet sich besonders an Studienanfänger, Studenten, die vor ihrer Bachelor-, Master- oder Diplomarbeit stehen, Doktoranden, Personen, die eine akademische Karriere anstreben. Das Lehrbuch ist sinnvoll für alle Studiengänge, richtet sich jedoch besonders an die Studierenden der Wirtschaftswissenschaften.
