**with Calculus, SI Version** Allyn J. Washington, 2005-02-01 **Declarative Agent Languages and Technologies II** João

Leite, Andrea Omicini, Paolo Torroni, Pinar Yolum, 2005-06-20 The second edition of the workshop on Declarative Agent Languages and Technologies DALT 2004 was held July 2004 in New York City and was a great success We saw a significant increase in both the number of submitted papers and workshop attendees from the first meeting held July 2003 in Melbourne Nearly 40 research groups worldwide were motivated to contribute to this event by submitting their most recent research achievements covering a wide variety of the topics listed in the call for papers More than 30 top researchers agreed to join the Program Committee which then collectively faced the hard task of selecting the one day event program The fact that

research in multi agent systems is no longer only a novel and promising research horizon at dawn is in our opinion the main reason behind DALT s still short success story On the one hand agent theories and app cations are mature enough to model complex domains and scenarios and to successfully address a wide range of multifaceted problems thus creating the urge to make the best use of this expressive and versatile paradigm and also pro t from all the important results achieved so far On the other hand bui ing multi agent systems still calls for models and technologies that could ensure system predictability accommodate exibility heterogeneity and openness and enable system veri cation
