Fortune's Formula William Poundstone, 2010-06-01 In 1956 two Bell Labs scientists discovered the scientific formula for getting rich One was mathematician Claude Shannon neurotic father of our digital age whose genius is ranked with Einstein's The other was John L. Kelly Jr. a Texas born gun toting physicist Together they applied the science of information theory the basis of computers

and the Internet to the problem of making as much money as possible as fast as possible Shannon and MIT mathematician Edward O Thorp took the Kelly formula to Las Vegas It worked They realized that there was even more money to be made in the stock market Thorp used the Kelly system with his phenomenally successful hedge fund Princeton Newport Partners Shannon became a successful investor too topping even Warren Buffett s rate of return Fortune s Formula traces how the Kelly formula sparked controversy even as it made fortunes at racetracks casinos and trading desks It reveals the dark side of this alluring scheme which is founded on exploiting an insider s edge Shannon believed it was possible for a smart investor to beat the market and William Poundstone s Fortune s Formula will convince you that he was right **The Bubble**

Economy Robert U. Ayres, 2014-06-06 Why the global economy has become increasingly unstable and how financial de carbonization could break the pattern of bubble driven wealth destruction The global economy has become increasingly perhaps chronically unstable Since 2008 we have heard about the housing bubble subprime mortgages banks too big to fail financial regulation or the lack of it and the European debt crisis Wall Street has discovered that it is more profitable to make money from other people s money than by investing in the real economy which has limited access to capital resulting in slow growth and rising inequality What we haven t heard much about is the role of natural resources energy in particular as drivers of economic growth or the connection of global warming to the economic crisis In The Bubble Economy Robert Ayres an economist and physicist connects economic instability to the economics of energy Ayres describes among other things the roots of our bubble economy including the divergent influences of Senator Carter Glass of the Glass Steagall Law and Ayn Rand the role of energy in the economy from the oil shocks of 1971 and 1981 through the Iraq wars the early history of bubbles and busts the end of Glass Steagall climate change and the failures of austerity Finally Ayres offers a new approach to trigger economic growth The rising price of fossil fuels notwithstanding fracking suggests that renewable energy will become increasingly profitable Ayres argues that government should redirect private savings and global finance away from home ownership and toward de carbonization investment in renewables and efficiency Large scale investment in sustainability will achieve a trifecta lowering greenhouse gas emissions stimulating innovation based economic growth and employment and offering long term investment opportunities that do not depend on risky gambling strategies with derivatives
