*Messung der Vulnerabilität der Armut* Katja Landau, 2012-10-26 Zusammenfassung Zur Bekämpfung der Armut ist es nicht nur wichtig Haushalte zu identifizieren die arm sind sondern auch solche die dem Risiko unterliegen arm zu werden In dieser Arbeit wird die Genauigkeit von Vorhersagen des Risikos gegenüber Einkommensarmut bezeichnet mit Vulnerabilität der Armut anhand von Querschnitts und Paneldaten bewertet Zur

Analyse werden deutsche Paneldaten das Sozio oekonomische Panel SOEP herangezogen Die Vorhersage ob Haushalte armutsgehrdet sind oder nicht basiert auf Regressionsmodellen mit unterschiedlichen Kovariablen Haushaltseigenschaften bzw Gruppen von Haushalten stetiges Einkommen oder Einkommen in Klassen Makrovariablen Die Genauigkeit der Vorhersagen wird mit der Receiver Operating Characteristic ROC gemessen die nicht nur den Anteil der richtig identifizierten armen Haushalte True Positive Rate TPR sondern auch den Anteil der falsch als armutsgehrdet klassifizierten Haushalte False Positive Rate FPR bercksichtigt Die Schtzer mit Querschnittsdaten sind weniger genau als mit Paneldaten Das ist auch der Fall wenn zur Schtzung nur das Einkommen in zwei Klassen verwendet wird F r Deutschland ist die Genauigkeit von Vulnerabilit ts Sch tzern selbst dann begrenzt wenn Paneldaten vorliegen Gr nde daf r sind die niedrige Armutsquote und die hohe Mobilit t der Haushalte in die Armut und aus der Armut heraus Abstract In order to reduce poverty it is clearly of interest to identify not only those households that are poor but also those that are at risk of becoming poor i e vulnerable to poverty In this research the accuracy of the ex ante assessments of vulnerability to income poverty is investigated using cross sectional and panel data For this purpose long term panel data from Germany the German Socio Economic Panel SOEP are used and different regression models are applied to classify whether a household is vulnerable or not These models include various covariates household covariates or groups according to household characteristics continuous or discrete previous year income macro covariates Predictive performance is assessed using the Receiver Operating Characteristic ROC which takes account of true positive as well as false positive rates Estimates based on cross sectional data are less accurate than those based on panel data This is true even if only imprecise information about income i e classification of households into two income groups are known In the case of Germany the accuracy of vulnerability predictions is limited even when panel data are used In part this low accuracy is due to low poverty incidence and high mobility in and out of poverty

*An Analysis of Mahbub Ul Haq's Reflections on Human Development* Riley Quinn, 2017-07-05 What is the ultimate goal of any human society There have been many answers to this question But by producing a series of notably well structured arguments economist Mahbub ul Haq's *Reflections on Human Development* persuaded readers that the goal should be defined quite simply as the requirement that each society improve the lives of its citizens If this is the agreed aim Haq continues then economic development should be designed to support human development His well structured reasoning helped development economists recalibrate much of what had previously been regarded as self evident that economic productivity was the main barometer of social well being The work had a profound effect and Haq's thinking helped produce a new understanding of what development actually meant Haq conscientiously mapped out arguments and counter arguments to persuade readers that development did not simply mean an increase in productivity but rather an increase in human development the capability of people to live the lives they want to By bringing the abstract back to the concrete Haq reevaluated the neoliberal reasoning that suggested economic development necessarily benefitted everybody And by virtue of his strong command of reasoning Haq showed how economic development provided no guarantees that rich people would spend money on improving health education or other human development outcomes for the poor

Development in Multiple Dimensions Alexander Lee, 2019-02-01 Why do some states provide infrastructure and social services to their citizens and others do not In Development in Multiple Dimensions Alexander Lee examines the origins of success and failure in the public services of developing countries Comparing states within India this study

examines how elites either control or are shut out of policy decisions and how the interests of these elites influence public policy He shows that social inequalities are not single but multiple creating groups of competing elites with divergent policy interests Since the power of these elites varies states do not necessarily focus on the same priorities some focus on infrastructure others on social services and still others on both or neither The author develops his ideas through quantitative comparisons and case studies focusing on four northern Indian states Gujarat West Bengal Bihar and Himachal Pradesh each of which represents different types of political economy and has a different set of powerful caste groups The evidence indicates that regional variation in India is a consequence of social differences and the impact of these differences on carefully considered distributional strategies rather than differences in ideology geography or institutions **Child**

**Benefits** Jane Waldfogel, 2025-06-06 The United States has one of the highest child poverty rates among wealthy countries and stands out among its peers as the only country that does not offer a child benefit regular payments from the government to most or all families with children not conditioned on parental employment During the temporary expansion of the Child Tax Credit CTC in 2021 the CTC functioned as a child benefit and the child poverty rate fell to the lowest level ever recorded in the United States Despite this decrease the CTC expansion was not renewed Concerns about enacting a child benefit include the cost the possibility of misuse of money by parents and how it might affect parental employment and fertility In Child Benefits social policy scholar Jane Waldfogel details the history and origins of child benefits around the world and comprehensively assesses how child benefits affect family spending fertility employment child poverty and child wellbeing to address such concerns and to determine the benefits of enacting such a policy permanently Drawing on research from peer countries in the Organization for Economic Cooperation and Development as well as the United States Waldfogel shows that a child benefit would prevent poverty and hardship and protect children from deep poverty and income instability The research is clear that families would spend the money from a child benefit on food clothing and other items for their children and that a child benefit would not have large negative impacts on parental employment or family decisions about fertility It also shows that a child benefit would promote short and longer term child and family wellbeing Child benefits have been shown to enhance opportunity and benefit society through healthier and better educated young adults and stronger and more stable families And rigorous benefit cost analyses indicate that a child benefit while costly would more than pay for itself yielding a large return on investment Waldfogel evaluates four current major proposals for a child benefit and provides recommendations for a policy that would deliver the best outcomes for children and families and the best return on investment She argues that such a policy would be more generous not tied to parental employment or earnings available to all parents but phased out for higher income families delivered in monthly payments through the tax system and provided in addition to existing social programs Child Benefits provides fascinating insights on the history and impacts of child benefits and makes a clear and definitive argument for the establishment of a child benefit in the United States **Annual World**
