Killer Micki Pistorius, 2023-11-14 Serial killers experience the power over life and death as omnipotence When I interrogate a serial killer I dive into the abyss of his soul From 1994 to 2000 when South Africa was a young democracy the country was stalked by a succession of brutal serial killers Psychologist Micki Pistorius became the first profiler for the South African Police Service playing a vital role in identifying and interrogating these killers as well as training detectives nationally and in other countries She broke ground with her theory on the origin of serial killers and is considered a trailblazer in her field *Catch Me a Killer* details the cases she worked on from the Station Strangler and the Phoenix Cane Killer to Boetie Boer and the Saloon Killer The book also features legendary detectives such as Piet Byleveld and Suiker Britz as well as the FBI s Robert Ressler Released alongside a major TV series based on the book this new edition of *Catch Me a Killer* includes a new chapter and up to date information about some of the cases such as the parole of Norman Afzal Simons in 2023 This is essential reading for all true crime aficionados [Learning from SARS](#) Institute of Medicine, Board on Global Health, Forum

on Microbial Threats, 2004-05-26 The emergence of severe acute respiratory syndrome SARS in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months In addition to the number of patients infected with the SARS virus the disease had profound economic and political repercussions in many of the affected regions

Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks This report examines the response to SARS by public health systems in individual countries the biology of the SARS coronavirus and related coronaviruses in animals the economic and political fallout of the SARS epidemic quarantine law and other public health measures that apply to combating infectious diseases and the role of international organizations and scientific cooperation in halting the spread of SARS The report provides an illuminating survey of findings from the epidemic along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections **Post-Truth Geographies** Barney

Warf, 2023-09-05 This book explores the geographical dimensions and implications of the post truth era Opening with a defense of the Enlightenment and the continued significance of science objectivity and truth it then provides three key perspectives on the concept The first is a philosophical analysis of post truth Social theory in various forms has sutured knowledge and power in the process relativizing the nature of truth This process reaches its apogee under post modernism which questions the very nature of truth itself The second is the examination of the historical origins and development of the post truth world While post truth has a history that can be traced back to the 18th and 19th centuries more recently it has growth prolifically through the use of social media The book examines post truth as it appears in the yellow journalism of the Hearst newspapers Holocaust denial and contemporary attacks on science itself e g the anti vaccine movement denial of evolution Post truth becomes a central issue in Western politics following Brexit and the election of Donald Trump who uses it frequently to advance a reactionary political agenda Russian hackers weaponize it to interfere in the politics of Europe and the U S Fox News and other right wing outlets also play a central role One result is the proliferation of unfounded conspiracy theories such as QAnon Today autocrats and dictators the world over use fake news to maintain their power Finally this book links the rise of a post truth society to the dynamics of contemporary economic geography Knowledge intensive capitalism has greatly elevated the significance of symbolic workers or the creative class Geographically contemporary capitalism has accentuated the agglomeration of producer services in large urban areas in which such workers labor Conversely rural areas and small towns have largely become repositories of the undereducated and thus are more susceptible to fake news

Subversive Horror Cinema Jon Towlson,2014-04-03 Horror cinema flourishes in times of ideological crisis and national trauma the Great Depression the Cold War the Vietnam era post 9 11 and this critical text argues that a succession of filmmakers working in horror from James Whale to Jen and Sylvia Soska have used the genre and the shock value it affords to challenge the status quo during these times Spanning the decades from the 1930s onward it examines the work of producers and directors as varied as George A Romero Pete Walker Michael Reeves Herman Cohen Wes Craven and Brian Yuzna and the ways in which films like *Frankenstein* 1931 *Cat People* 1942 *The Woman* 2011 and *American Mary* 2012 can be considered subversive

Molecular Dynamics at the Immunological Synapse Pedro Roda-Navarro,Andrés Alcover,Vincenzo Di Bartolo,2017-03-21 The immunological synapse IS is a specialised cell cell adhesion that mediates antigen acquisition and regulates the activation of lymphocytes Initial studies of the IS showed a structure composed of stable supra molecular activation clusters SMAC organised during the interaction of helper T lymphocytes with B lymphocytes working as antigen presenting cells A central SMAC of coalesced T cell receptors TCRs and a peripheral SMAC for cell cell adhesion were observed IS with similar structure was later described during antigen acquisition by B cells and during the interaction of NK cells with target and healthy cells More recent research developed with microscopy systems that improve the spatial and temporal resolution has showed the complex molecular dynamics at the IS that governs lymphocyte activation Currently the IS is seen as a three dimensional structure where signalling networks for lymphocyte activation and endosomal and cytoskeleton machinery are polarised A view has emerged in which dynamic microclusters of signalling complexes are composed of molecular components attached to the plasma membrane and other components conveyed on sub synaptic vesicles transported to the membrane by cytoskeletal fibers and motor proteins Much information is nonetheless missing about how the dynamics of the endosomal compartment the cytoskeleton and signalling complexes are reciprocally regulated to achieve the function of lymphocytes Experimental evidence also suggests that the environment surrounding lymphocytes exposed to different antigenic challenge regulates IS assembly and functional output making an even more complex scenario still far from being completely understood Also although some signalling molecular components for lymphocyte activation have been identified and thoroughly studied the function of other

molecules has not been yet uncovered or deeply characterised This research topic aims to provide the reader with the latest information about the molecular dynamics governing lymphocyte activation These molecular dynamics dictate cell decisions Thus we expect that understanding them will provide new avenues for cell manipulation in therapies to treat different immune related pathologies
