Performance Evaluation Software Bahadir Karasulu,Serdar Korukoglu,2013-03-25 Performance Evaluation Software

Moving Object Detection and Tracking in Videos introduces a software approach for the real time evaluation and performance comparison of the methods specializing in moving object detection and or tracking D T in video processing Digital video content analysis is an important item for multimedia content based indexing MCBI content based video retrieval CBVR and visual surveillance systems There are some frequently used generic algorithms for video object D T in the literature such as Background Subtraction BS Continuously Adaptive Mean shift CMS Optical Flow OF etc An important problem for performance evaluation is the absence of any stable and flexible software for comparison of different algorithms In this frame we have designed and implemented the software for comparing and evaluating the well known video object D T algorithms on the same platform This software is able to compare them with the same metrics in real time and on the same platform It also works as an automatic and or semi automatic test environment in real time which uses the image and video processing essentials e g morphological operations and filters and ground truth GT XML data files charting plotting capabilities etc Along with the comprehensive literature survey of the abovementioned video object D T algorithms this book also covers the technical details of our performance benchmark software as well as a case study on people D T for the functionality of the software **Digital Signal Processing** S.
