Energy Accounts Dan Willis, William Braham, Katsuhiko Muramoto, Daniel Barber, 2016-06-23 How

does one tell the story of energy production use or conservation in a manner sufficiently convincing to influence policy behavior and design Energy Accounts explores potential answers to this question through compelling images data visualizations narratives and other examples of accounting for energy Organized into a collection containing both examples of best practices and critiques this impressive array of projects and contributors combines text and graphic material to explore different representations of energy data Including work from Kieran Timberlake SHoP AMO Lateral Office WOHA and many more the book boasts a unique graphic design which supports and enhances its role as a valuable resource for professionals and students in architecture engineering and urban design *The Great Plant-Based Con* Jayne Buxton, 2022-06-09 WINNER OF THE INVESTIGATIVE FOOD WORK AWARD AT THE GUILD OF FOOD WRITERS AWARDS 2023 The most incredible book Delia Smith Persuasive entertaining and well researched Sunday Times Plant based is best for health go vegan to help save the planet eat less meat Almost every day we are bombarded with the seemingly incontrovertible message that we must reduce our consumption of meat and dairy or eliminate them from our diets altogether But what if the pervasive message that the plant based diet will improve our health and save the planet is misleading or even false What if removing animal foods from our diet is a serious threat to human health and a red herring in the fight against climate change In *THE GREAT PLANT BASED CON* Jayne Buxton demonstrates that each of these what ifs is in fact a reality Drawing on the work of numerous health experts and researchers she uncovers how the separate efforts of a constellation of individuals companies and organisations are leading us down a dietary road that will have severe repercussions for our health and wellbeing and for the future of the planet *THE GREAT PLANT BASED CON* is neither anti plant nor anti vegan it is a call for us to take an honest look at the facts about human diets and their effect on the environment Shocking and eye opening this book outlines everything you need to know to make more informed decisions about the food you choose to eat **The Tragedy of the Commodity** Stefano B. Longo, Rebecca Clausen, Brett Clark, 2015-06-25 Winner of the 2017 Paul Sweezy Marxist Sociology Book Award from the American Sociological Association Although humans have long depended on oceans and aquatic ecosystems for sustenance and trade only recently has human influence on these resources dramatically increased transforming and undermining oceanic environments throughout the world Marine ecosystems are in a crisis that is global in scope rapid in pace and colossal in scale In *The Tragedy of the Commodity* sociologists Stefano B Longo Rebecca Clausen and Brett Clark explore the role human influence plays in this crisis highlighting the social and economic forces that are at the heart of this looming ecological problem In a critique of the classic theory the tragedy of the commons by ecologist Garrett Hardin the authors move beyond simplistic explanations such as unrestrained self interest or population growth to argue that it is the commodification of aquatic resources that leads to the depletion of fisheries and the development of environmentally suspect means of aquaculture To illustrate this argument the book features two fascinating case studies the thousand year history of the bluefin tuna fishery in the Mediterranean and

the massive Pacific salmon fishery Longo Clausen and Clark describe how new fishing technologies transformations in ships and storage capacities and the expansion of seafood markets combined to alter radically and permanently these crucial ecosystems In doing so the authors underscore how the particular organization of social production contributes to ecological degradation and an increase in the pressures placed upon the ocean The authors highlight the historical political economic and cultural forces that shape how we interact with the larger biophysical world A path breaking analysis of overfishing The Tragedy of the Commodity yields insight into issues such as deforestation biodiversity loss pollution and climate change
