Direct Marketing The New Law Information Law:

Ad Law Richard Lindsay, 2016-09-03 Ensuring marketers and advertisers are aware of the laws and regulations of advertising is now more important than ever. If a campaign is found to be potentially offensive, harmful or misleading, it can go viral in just the click of a mouse and the implications of breaching those laws are likely to be both damaging and costly to a brand's reputation, its creative work and the strategic planning behind it. Now offering level-headed advice on everyday questions encountered when designing and running promotional campaigns, **Ad Law**, the new book from the Institute of Practitioners in Advertising (IPA), is the ultimate handbook to the law and regulation of advertising and marketing communications. Containing guidance based on real-world experiences from media and advertising lawyers and the IPA legal team, this book expertly leads readers through the most applicable laws and regulations, common pitfalls and the practicalities behind them, such as the new industry standard client agency agreement. Covering issues such as intellectual property, privacy and defamation, plus the self-regulatory framework, **Ad Law** is the ideal companion for any advertising and marketing professional or lawyer working within these sectors.

The New Legal Framework for E-Commerce in Europe Lilian Edwards, 2005-12-19 This collection of essays by well-known specialists in e-commerce and Internet law, drawn from both academia and practice, analyses recent crucial legislation which has created for the first time a legal regime governing European electronic commerce. The central focus is on the European Electronic Commerce Directive and its implementation in the UK since August 2002. The E-Commerce Directive develops a distinctive European strategy for regulating and promoting on-line business and the information society. Areas of the Directive analysed include contracting on-line, Internet service provider liability, consumer privacy, including spam and cookies, country of origin regulation and on-line alternative dispute resolution (ODR). Further chapters move beyond the Directive to discuss other important new laws in this domain, including the Privacy and Electronic Communications Directive, the Distance Selling Directives, the Electronic Money Directive, the Lawful Business regulations on employee surveillance, the disability discrimination rules affecting websites and the extension of VAT to on-line transactions. Both the European framework and the rules as implemented in the UK are examined and critiqued for how well they meet the needs of business and consumers.
