Language as Discourse Michael McCarthy, Ronald Carter, 2014-07-22 In this book Michael McCarthy and Ronald Carter describe the discursual properties of language and demonstrate what insights this approach can offer to the student and teacher of language. The authors examine the relationship between complete texts both spoken and written and the social and cultural contexts in which they function. They argue that the functions of language are often best understood in a discursual environment and that exploring language in context compels us to revise commonly held understandings about the forms and meanings of language. In so doing the authors argue the need for language teachers syllabus planners and curriculum organisers to give greater attention to language as discourse.

Discourse analysis applied to english language teaching in colombian contexts: theory and methods Wilder Yesid, Escobar Alméciga, 2016-02-29 By moving away from instrumental views of language the book *Discourse Analysis Applied English Language Teaching in Colombian Contexts Theory and Methods* situates the teaching and learning of English as a foreign language along a broader spectrum of socio culturally elaborated discursive dynamics. To offer this complex and multifaceted perspective it presents five discourse studies informed by diverse methodologies and aims to provoke further and deeper considerations around the issue of English teaching and learning in Colombian contexts. Similarly this work also exemplifies academic community building where different institutions researchers and students have partnered to inquire into understand and share their findings regarding EFL teaching and learning in Colombia.

International Handbook of English Language Teaching Jim Cummins, Chris Davison, 2007-12-31 This two volume handbook provides a comprehensive examination of policy practice

research and theory related to English language teaching (ELT) in international contexts. Nearly 70 chapters highlight the research foundation for the best practices frameworks for policy decisions and areas of consensus and controversy in the teaching and development of English as a second and/or additional language for kindergarten through to adult speakers of languages other than English. In doing so, it problematizes traditional dichotomies and challenges the very terms that provide the traditional foundations of the field. A wide range of terms has been used to refer to the key players involved in the teaching and learning of the English language and to the enterprise of English language teaching as a whole. At various times and in different contexts, the following labels have been used in countries where English is the dominant language to describe programs, learners, or teachers of English: English as a second language (ESL), English as an additional language (EAL), limited English proficient (LEP), and English language learners (ELL). In contexts where English is not the dominant language, the following terms have been used: English as a foreign language (EFL), English as an international language (EIL), and English as a lingua franca (ELF).

Discourse Analysis and English Language Teaching M. J. Warren, 1985. *Understanding Multimodal Discourses in English Language Teaching Textbooks* Christopher A. Smith, 2022-08-11. Textbooks are indispensable components and in some cases the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective: one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions, and reifications. The triangulated approach demonstrated in a series of vignettes featuring Korean university students and native English-speaking instructors can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.
