Bangladesh Technical Education Board :

Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e.g. Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries

The Future of Technology Education P John Williams, Alister Jones, Cathy Bunting, 2014-11-17 Twenty five years ago there was increasing optimism in policy, curriculum and research about the contribution that technology education might make to increased technological literacy in schools and the wider population. That optimism continues although the status of technology as a learning area remains fragile in many places. This edited book is offered as a platform from which to continue discussions about how technology education might progress into the future and how the potential of technology education to be truly relevant and valued in school learning can be achieved. The book results from a collaboration between leading academics in the field, the wider group of authors having had input into each of the chapters. Through the development of a deep understanding of technology based on a thoughtful philosophy, pathways are discussed to facilitate student learning opportunities in technology education. Consideration is given to the purposes of technology education and how this plays out in curriculum, pedagogies and assessment. Key dimensions including design, critique, students' cultural capital are also explored as are the role and place of political persuasion, professional organisations and research that connects with practice. The discussion in the book leads to a conclusion that technology education has both an ethical and moral responsibility to support imaginings that sustain people and communities in harmony and for the well being of the broader ecological and social environment.

Regional Inequality in the Distribution Pattern and Accessibility of Educational Institutions in Sylhet Division, Bangladesh Choudhury Touhida Anwer, 2016-04-20 Education is one of the most important constituents of human resource development. In this study, an attempt has been made to find out the regional inequality in distribution pattern and accessibility of educational institutions in Sylhet Division, Bangladesh. Spatial dispersion with regard to the city center district headquarter has been calculated to find out the distributional pattern. Accessibility of the educational institutions has been computed with the help of the number of educational institutions, population density and total area of the Sylhet division where the relationship between density of population and educational institutions have been taken in consideration. Correlation between the density of populations and the density of educational institutions is established by analyzing standard statistical techniques as well as spatial analysis.

Bangladesh at Fifty Mustafa K. Mujeri, Neaz Mujeri, 2020-11-07 This book explores the diverse experience of Bangladesh's development over the last fifty years and provides systematic explanations of its success in socioeconomic development It also assesses future trends on the basis of past experiences It is widely acknowledged that Bangladesh provides one of the most striking examples in the study of present day development along with rapid growth and catching up

The analysis highlights the development traps that Bangladesh faced during its journey and the ones that may have to be faced in the coming decades in order to move towards prosperity. The book asserts that explaining Bangladesh's development is not for the simpleminded; any single mono-causal explanation for Bangladesh's development is bound to fall down in the face of reality. This book will be of interest to academics, students, policy makers and development practitioners especially in developing countries, in particular in South Asia and Bangladesh.
