Agenda for Sustaining Small and Medium-sized Enterprises Mohd. Khairuddin Hashim, 2011 Agenda for Sustaining Small and Medium Sized Enterprises is the tenth volume of articles compiled into a book. The book represents another attempt made to address issues of importance to the management and development of small and medium sized enterprises SMEs. More specifically this particular volume focuses on the sustainability of SMEs. Just as in the earlier ninth volumes the eight articles introduced in this tenth volume are earlier papers presented at several international conferences which were held locally and abroad. Interestingly each of the eight articles in the book attempts to deal with a specific issue that is relevant and related to the sustainability of SMEs. Taken together the book not only helps readers to better understand SMEs but also explains the different issues involved in sustaining a small business. More meaningfully the articles in the book seek to provide students, owners and managers of SMEs and policy makers useful insights into the scope and complexity of sustaining the business activities of SMEs.

Impact of Smallholders' Access to Land and Credit Markets on Technology Adoption and Land Use Decisions Nunung Nuryartono, 2005-10-17 This study examines the impact of smallholders' access to land and credit markets and its impact on the adoption of technologies as well as land use decisions in the vicinity of the Lore Lindu national park, Central Sulawesi, Indonesia. The study focuses on upland areas which are devoted to cocoa and coffee because these agricultural activities contribute to the pressure on the Lore Lindu National Park. At the current level of forest encroachment these activities threaten the existence of the Lore Lindu National Park. The adoption of technologies as an indicator of agricultural intensification can play an important role in reducing the pressure on the forest. A necessary condition to apply advanced technology is the availability of sufficient financial capital. However, most of the farm households in the vicinity of the Lore Lindu National Park are categorized as smallholders and face a lack of capital. Therefore, the role of rural financial services to relax their liquidity constraint is important. In the analyses, the rural financial services are divided into informal and formal credit institutions. The various econometrics models used in the analysis are: 1. the determinants of land possessions by households by using a tobit model; 2. the determinants of households' access to and participation in informal credit markets by using a probit model; 3. the determinants of technology adoption by using a two step and recursive model; 4. The determinants of the households' credit constraint by applying a probit model; and 5. the impact of households' credit constraint on land use decisions by using a switching regression model.
