Unnoticed Notifications Arun A K,2024-09-12 They say on average a person spends four hours a day using their mobile phone which is almost 25% of their waking hours With such an amount of time spent on screen time there are moments when we don't look at our phones for a couple of hours while we are occupied with something important When we finally check our phones we often find a bunch of push notifications on our home screen We tend to focus on the communications from a few important applications have a quick glance at the rest and then clear all the notifications at once Later when we visit a particular application or when someone reminds us of a message they have sent we realize that an important communication was hidden among those push notifications which we should have responded to but failed to notice at the time Similarly due to the various roles we play daily each demanding a lot of our time we tend to miss out on the important notifications life gives us If we can constructively interpret the instances of our lives regularly by introspecting we would discover profound insights hidden in those incidents which would help us grow in maturity The chapters in this book contain such profound inferences which I have derived from my own life experiences These insights went unnoticed when they happened but I discovered them days

months or even years later I wish to share them with the world and that's how Unnoticed Notifications was born

Sustainable Ecological Engineering Design Christopher Gorse, Beth Jones, Darryl Newport, Colin Booth, Lloyd Scott, Mohammad Dastbaz, Saheed Ajayi, Bianca Drotleff, 2025-05-03 The International Conference of Sustainable Ecological Engineering Design for Society SEEDS brings together global experts to focus on a sustainability agenda and the positive and detrimental changes that are taking place.
