

Basic principles of vacuum technology, brief overview

Introduction

Basic principles of vacuum technology What is a vacuum?

A vacuum is a space entirely devoid of matter ("absolute vacuum"). In practice we talk about a vacuum when the air pressure in a space lies below atmospheric pressure.

Vacuum ranges

Units of measurement

There are a large number of national and international units of measurement. The most commonly used units are Pascal (Pa) and bar.

3.99 Pa = 3.99 mPa
3.99 Pa = 3.99 mbar
3.99 bar = 3.99 bar

This vacuum level is often expressed as a % value. However, these are always relative values.

RV = Rough vacuum
MV = Medium vacuum
HV = High vacuum
UHV = Ultra-high vacuum

What is a vacuum used for?

The vacuum pump is used not only in research in the fields of chemistry, biology and physics, it is also indispensable in many industrial processes.

Measuring the pressure or vacuum

In the rough vacuum range, the pressure gauges used are mainly mechanical, but some digital pressure gauges are also used. In the high and ultra-high vacuum range, highly sensitive pressure gauges are used.

Atmospheric pressure

1. Mount Everest
2. Peak
3. Sea level

Understanding vacuum

Air is a gas, mixture with approx. 10^{25} particles per m^3 of air at one bar air pressure. Particles exert pressure or force on the walls of a defined space. The fewer particles there are in the space, the lower the force exerted on the walls.

$$\text{Pressure} = \frac{\text{Force}}{\text{Area}}$$

1.00% vacuum would mean that there are 99 particles present. Pressure = 0.

Vacuum specifications in terms

A vacuum can be specified as an absolute value, i.e. with a positive sign from 0 to 1 bar, with 0 as absolute zero. Or it can be specified as a relative value with a negative sign from 0 to -1 bar, with 0 as a reference point, or as a %.

Effects of changes in vacuum technology

As altitude increases, the air pressure in the atmosphere falls. This same effect reduces the absolute vacuum level of an ejector. Nevertheless, the pressure level of 80% remains unchanged in this case.
