Proceedings of the International Seminar on Delivering Transpersonal Guidance and Counselling Services in School (ISDTGCSS 2022) Diana Septi Purnama,Mariani Binti Omar,Mohsin Shaikh,Yuli Nurmallasari,Natri Sutanti,Indriyana Rachmawati,2023-03-23 This is an open access book Innovation in the guidance and counseling profession is important so that counselors teachers or guidance and counseling practitioners can provide optimal services to their counselees Along with the development of science creativity and technology in the fields of psychology education and guidance and counseling various innovations and intervention in the implementation of counseling have been carried out Especially with the Covid 19 pandemic which is still on going various creative interventions in counseling have begun to be widely used Starting from the use of images for therapy or art therapy dance movement and the use of other creative media to support the counselee The need for creative media and innovation in

the implementation of counseling is very important at this time considering that during the pandemic the intensity of face to face contact with counselees and counselors is quite limited and most of them use online media Saturation in the use of online media is also possible to occur a lot therefore with the existence of creative interventions that can be guided by a virtual counselor it will be very interesting for the counselee as well as having a therapeutic impact Therefore an international seminar was held with the theme creative counseling intervention This activity can be followed by guidance and counseling teachers counselors or various other mental health practitioners to increase information and knowledge about creative interventions in counseling In the end participants can provide creative and effective counseling services to their counselees

The Mental Health of Refugees Kenneth E. Miller, Lisa M. Rasco, 2004-05-20 It is estimated that at least 33 million people around the world have been displaced from their homes by war or persecution Numerous studies have documented high rates of psychological distress among these survivors of extreme violence and forced migration yet very few have access to clinic based mental health care In any case clinic based services cannot adequately address the constellation of displacement related stressors that affect refugees daily whether in a new region of their homeland or a new country stressors such as social isolation the loss of previously valued social roles poverty and a lack of employment opportunities and difficulties obtaining education and medical care Additionally many refugees from non western societies find western methods of psychiatric and psychological healing culturally alien or stigmatizing and therefore underutilize such services This book brings together an international group of experts on the mental health of refugees who have pioneered a new approach to healing the psychological wounds of war and forced migration Their work is guided by an ecological model which in contrast to the prevailing medical model of psychiatry and clinical psychology emphasizes the development of culturally grounded mental health interventions in non stigmatized community settings The ecological model also prioritizes synergy with natural community resources to promote adaptation prevention over treatment the active involvement of community members in all phases of the intervention process and the empowerment of marginalized communities to address their own mental health needs Drawing on their expertise in community psychology prevention science anthropology social psychology social psychiatry public health and child development the authors present a variety of highly innovative culturally grounded interventions designed to improve the mental health and psychosocial well being of communities that have survived the nightmares of political repression civil war and genocide They discuss the various conceptions of well being and distress that have informed their projects their own integrations of western and indigenous approaches to understanding and relieving psychological distress and in several instances their creative use of well trained paraprofessionals They examine with remarkable candor the challenges they have faced in carrying out their work in extraordinarily demanding conditions An extended introductory chapter reviews and analyzes what we know about the impact of political violence and exile on mental health and lays out the ecological model in rich theoretical and empirical context The first of two concluding chapters

addresses the critical and often neglected issue of the evaluation of community based interventions in conflict and post conflict settings the second sums up the implications of the achievements and limitations of the programs described poses questions that must be answered such as How adequate is the PTSD construct in capturing the nature of refugee trauma and suggests numerous directions for future research and practice The Mental Health of Refugees Ecological Approaches to Healing and Adaptation is an essential reference for all professionals who seek to serve members of this vulnerable population for those who train and supervise them and for program administrators and policymakers concerned with refugee well being It is also an excellent resource for graduate courses in public mental health community psychology and psychiatry refugee and immigrant studies psychological trauma medical anthropology and ethnopolitical violence

Comprehensive Handbook of Psychotherapy Integration George Stricker, Jerold R. Gold, 2013-06-29 This Handbook is the culmination of an interest in psychotherapy integration that led to our first professional collaboration in 1978 At that time we undertook in research conducted for a doctoral dissertation by the second editor and supervised by the senior editor to understand from and within a psychodynamic perspective the experiences of patients who had completed behavioral therapies At that time psychotherapy integration was a topic considered viable and interesting by only a few clinicians and scholars with little communication among them and less awareness concern and appreciation on the part of psychotherapists in general The situation today has changed The appearance of this Handbook may be taken as a significant sign of maturation and legitimacy of work in psychotherapy integration It is our hope and expectation that this volume will serve as an up to date and exhaustive overview of the status of ongoing scholarly and clinical work in the integration of the major schools of psychotherapy The Handbook opens with a section that will provide the reader with an overview of the history sociocultural context and empirical status of the broad field of psycho therapy integration
