MODULE 1

1. What is diversion headwork, what are the purpose of diversion headwork

Head work

Any hydraulic structure which supply water to the off taking canal is called a headwork

Dividing in to two;

Storage headwork

- construction of dam across the river
- Store water during excess supplies in the river and release when demand overtake available supply

Diversion headwork

- Divert the required supply in to the canal from the river

Purpose of diversion headwork

- Rises the water level in the river
- Regulate the intake of water in to canal
- Control silt entry in to the canal
- Reduce fluctuations in the level of supply in the river

2. Draw the layout plan of a Diversion headwork and mark its components of Diversion head work

3. Sketch the layout of a diversion headworks and mark the components
