

Statements of Teaching Philosophy

Gail E. Goodyear

University of Texas at El Paso

Well-defined teaching philosophy is essential to creating and maintaining a campus culture supportive of teaching. Presented in this paper are reasons for statements of teaching philosophy as well as descriptions of how the statements are beneficial to students, faculty, and university administrations. Described are ways of creating a statement of teaching philosophy and dimensions that may be included in such statements. This article begins a discussion of roles, composition, and evaluation of statements of teaching philosophy.

Teaching is a scholarly activity when it is purposeful, reflective, documented, and shared in an evaluative forum (Menges & Weimer, 1996). Articulating an individual teaching philosophy provides the foundation by which to clarify goals, to guide behavior, to seed scholarly dialogue on teaching, and to organize evaluation. Statements of teaching philosophy function both personally and publicly. A professor who writes a teaching philosophy wants to document beliefs, values, and approaches. It may be written to clarify or reflect on practice, to receive feedback from colleagues, or to articulate a view of teaching for administrative decision-making (Murray, 1995). Regardless of the purpose, the activity demonstrates a deep commitment to teaching and also to growing personally and professionally.

An administration that asks its professors to record formally their teaching philosophies expresses a value for scholarly approaches to teaching and for working toward clearly articulated educational goals. Often professors present their teaching scholarship in a teaching portfolio (Hutchings, 1996; Murray, 1995; Lyons, 1998; O'Neil & Wright, 1995; Seldin, 1997; Shore, Foster, Knapper, Nadeau, Neill, & Sim, 1991). A clear statement of teaching philosophy can organize such a portfolio and help determine its content (Lang, 1996; Rodriguez-Farrar, 1997). Thus, statements of teaching philosophy are central to teaching scholarship from several perspectives.

While there now abound many documents on teaching portfolios, or dossiers, there is comparatively little commentary on statements of teaching philosophy, their role, how to compose them, or how to evaluate them as personal statements (see Chism, 1998, for a valuable, brief contribution). In this article, we hope to begin to remedy the dearth. In particular, we will profile how a statement of teaching philosophy functions beyond a mere catalog of teaching responsibilities or strategies. The "why's" of teaching contrast with, but provide an essential foundation for, the "how's" and "what's" of teaching. In addition, we underscore how discussing teaching philosophy is a professional, scholarly activity that contributes to developing a productive culture of teaching — a culture shaped by faculty and supported by faculty development programs.

The Setting

Our presentation here draws on and summarizes discussions by a group of faculty who developed teaching portfolios through a workshop series. Here, at the University of Texas at El Paso (UTEP), as elsewhere, concerns about evaluating the effectiveness of teaching have grown in recent years. This has primed discussion on teaching itself. In part, through support from a "Model Institutions for Excellence" grant from the National

The Importance of Philosophy in Teacher Education Andrew Colgan, Bruce Maxwell, 2019-08-29 The Importance of Philosophy in Teacher Education maps the gradual decline of philosophy as a central integrated part of educational studies Chapters consider how this decline has impacted teacher education and practice offering new directions for the reintegration of philosophical thinking in teacher preparation and development Touching on key points in history this valuable collection of chapters accurately appraises the global decline of philosophy of education in teacher education programs and seeks to understand the external and endemic causes of changed attitudes towards a discipline which was once assigned such a central place in teacher education Chapters illustrate how a grounding in the theoretical and ethical dimensions of teaching learning and education systems contribute in meaningful ways to being a good teacher and trace the consequences of a decline in philosophy on individuals professional development and on the evolution of the teaching profession more broadly With this in mind the text focusses on the future of teacher education and considers how we can ensure that philosophy of education feeds into the excellence of teaching today This book will be of great interest to graduate postgraduate students as well as research scholars in the field of educational philosophy and history of education In addition it will be useful for those involved in teacher education and in particular course module and program development

Neoliberalizing the University: Implications for American Democracy Sanford Schram, 2017-10-02 This collection brings together essays to address the crisis of Higher Education today focusing on its neoliberalization Higher Education has been under assault for several decades as neoliberalism s preference for market based reforms sweeps across the US political economy The recent push for neoliberalizing the academy comes at a time when it is ripe for change especially as it continues to confront growing financial pressure particularly in the public sector The resulting cutbacks in public funding especially to state universities led to a variety of debilitating changes increases in tuition growing student debt more students combining working and schooling declining graduation rates for minorities and low income students increased reliance on adjuncts and temporary faculty and

most recently growing interest in mass processing of students via online instruction While many serious questions arise once we begin to examine what is happening in higher education today one particularly critical question concerns the implications of these changes on the relationship of education to as yet still unrealized democratic ideals The 12 essays collected in this volume create important resources for students faculty citizens and policymakers who want to find ways to address contemporary threats to the higher education democracy connection This book was originally published as a special issue of New Political Science

about quality mathematics education are often posed in terms of the types of mathematics that are worthwhile and valuable for both the student and society in general and about how to best support students so that they can develop this mathematics. Concerns about equity are about who is excluded from the opportunity to develop quality mathematics within our current practices and systems and about how to remove social barriers that systematically disadvantage those students. This collection of chapters summarises our learning about the achievement of both equity and quality agendas in mathematics education and to move forward the debate on their importance for the field. *National Guide to Funding in Higher Education*, 1996
