Alexander,2017 This publication presents the case for dialogic teaching not as another transient educational fad but as the necessary outcome of decades of research on language thinking learning and teaching by scholars working in diverse disciplines and cultures The publication then sets out the principles on which dialogic teaching is based identifies specific classroom indicators to guide the development and evaluation of professional practice reports interim findings from classroom based development projects and offers suggestions for further reading and support      **Dialogic Methodology for Transdisciplinary Practice-Based**

**Research** E. Jayne White, Mahtab Janfada, 2025-01-17 Dialogic methodology is a specific approach to research that invites creative engagement with plural voices and their meanings in lived experience. It draws from the writings of Russian philosopher Mikhail Bakhtin who established an agenda for the study of dialogue. In *Dialogic Methodology for Transdisciplinary Practice Based Research*, E. Jayne White and Mahtab Janfada introduce the premises, processes, and practices of dialogic methodology as a legitimised approach to the transdisciplinary study of practice. Drawing on a series of Bakhtin's original writings and dynamic interviews from dialogic scholars across the globe, the authors advocate approaches to research that invite speculative inquiry and even question the original assertions that oriented the issue in the first place. As White and Janfada set out an alternative pathway for scholars and students to contemplate the relevance of dialogism for their research, they offer an expansive possibility for contemplating issues, paradoxes, or problems across diverse practice contexts. They present their approach as an alternative methodological framework for research in educational contexts, emphasizing the subjectivities that support and/or thwart their effectiveness and purpose. Hence, this methodology seeks points of departure from traditional object-subject based research on or about the other to interdisciplinary investigations that determinedly bring all parties into investigation and inquiry. Synthesizing the latest research in the field and translating complex ideas into real-life practice contexts, this book walks readers through the ins and outs of dialogic methodology with a view of how to apply the approach to their own research and practice.

#### **Science Education in the Arab Gulf States**

Nasser Mansour, Saeed Al-Shamrani, 2015-04-27 The book introduces the development of science education in the Arab Gulf states and presents a critical analysis of current issues and concerns in educational research in science education. The key purpose is to provide some perspectives on the state of science education in Gulf and to share experiences with international scholars about the impact of the innovations and reforms implemented in science education in Arabian Gulf. But *Science Education in the Arab Gulf States* also intends to present new visions and to make suggestions and recommendations about the contribution of science education to prepare students in the knowledge age. The volume is organised into three main sections. The first section addresses the current practices and challenges in science education in some of the Arab Gulf states. This section sheds critically the light on the challenges and problems that hinder or constrain the implementation of innovations in science education. The second section analyses the science educational reforms and innovations that are being implemented in the Arabian Gulf. This section presents experiences and research with using new approaches to teaching and learning in science classrooms in some of the Arab Gulf states. The third section discusses the socio-cultural issues that have impacted on shaping and reshaping the science education in the Arabian Gulf. This section focuses on exploring the socio-cultural factors that influence engagement and non-engagement in science education. It also explores how socio-cultural issues and contexts guide the reform of science education in the Arabian Gulf and presents various examples of how we can respond to cultural issues.
