Part II covers important topics such as Fourier Series Bessel Functions and Orthogonal Set of Functions and Sturm Liouville Problem among others. The third part Partial Differential Equations deals aptly with topics such as Linear and Non Linear Partial Differential Equations of Order One Riemann Method and Monge's Method. *Integral Equations and Boundary Value Problems* MD Raisinghania, The tenth edition of Integral Equations and Boundary Value Problems continues to offer an in depth presentation of integral equations for the solution of boundary value problems. The book provides a plethora of examples and step by step presentation of definitions proofs of the standard results and theorems which enhance students problem solving skills. Solved examples and numerous problems with hints and answers have been carefully chosen classified in various types and methods and presented to illustrate the concepts discussed. With the author's vast experience of teaching mathematics his approach of providing a one stop solution to the students problems is engaging which goes a long way for the reader to retain the knowledge gained. Ordinary & Partial Diff. Equation M. D. Raisinghania, 2008 Tremendous response from teachers and students to the last edition of this book has necessitated the revision of the book in a very short span of time.
