Digital Design Exercises for Architecture Students teaches you the basics of digital design and fabrication tools, with creative design exercises, featuring over 100 illustrations, which emphasize process and evaluation as key to designing in digital mediums. The book is software neutral, letting you choose the software with which to edit curves and create graphics and to model digital objects. The clear, step-by-step introductions to key concepts and some help you experiment and build your digital media skills. During the fabrication exercises you will learn strategies for laser cutting, CNC machining, numerically controlled milling, and 3D printing to help you focus on the processes of design thinking. Reading lists and images from practitioners, instructors, and theorists ground the exercises in both broader and deeper contexts and encourage you to continue your investigative journey.
