Ubiquitous Computing Systems Hitomi Murakami, Hideyuki Nakashima, Hideyuki Tokuda, Michiaki Yasumura, 2005-08-29

This book is a collection of papers presented at UCS 2004 held on November 8-9 in Tokyo. UCS is a series of international symposia sponsored by the special interest group Ubiquitous Computing Systems of the Information Processing Society of Japan. The first UCS was held on November 17 2003 in Kyoto. It was held as an invitation based symposium. UCS 2004 was the second of the series and the first submission based conference. UCS focuses on the emerging research area of ubiquitous computing systems. This emergence is an outcome of the rapid evolution in smart appliances and devices as well as tremendous advances in wireless networks and mobile computing. In the last few years various applications of information technology have been changing our everyday life rapidly and to a large extent. The best example is the use of mobile phones. By getting new sensing devices cameras their application field is no longer limited to communication but covers data communications including Internet access and data and program upload downloading and so on. The

symposium offered the opportunity for in depth exploration of the most recent research and development findings in the field of ubiquitous computing. The submitted papers presented at UCS 2004 suggest such a direction to future technologies including mobile ad hoc networks, sensor networks, and context aware technologies.
