Finding Metaphor In Grammar And Usage A Methodological Analysis Of Theory And Research Converging Evidence In Language And Communication Research:

Finding Metaphor in Grammar and Usage Gerard Steen, 2007 Cognitive linguists have proposed that metaphor is not just a matter of language but of thought and that metaphorical thought displays a high degree of conventionalization In order to produce converging evidence for this theory of metaphor a wide range of data is currently being studied with a large array of methods and techniques Finding Metaphor in Grammar and Usage aims to map the field of this development in theory and research from a methodological perspective It raises the question when exactly evidence for metaphor in language and thought can be said to count as converging It also goes into the various stages of producing such evidence conceptualization operationalization data collection and analysis and interpretation The book offers systematic discussion of eight distinct areas of metaphor research that emerge as a result of approaching metaphor as part of grammar or usage language or thought and symbolic structure or cognitive process *Finding Metaphor in Grammar and Usage* Gerard J.

Metonymy and Metaphor in Grammar Klaus-Uwe Panther, Linda L. Thornburg, Antonio Barcelona, 2009 with the advent of Cognitive Linguistics metonymy and metaphor are now recognized as being not only ornamental rhetorical tropes but fundamental figures of thought that shape to a considerable extent the conceptual structure of languages The present volume goes even beyond this insight to propose that grammar itself is metonymical in nature Langacker and that conceptual metonymy and metaphor leave their imprints on lexicogrammatical structure *Finding Metaphor in Grammar and Usage*

Gerard Steen, 2009 Studies in Figurative Thought and Language Angeliki Athanasiadou, 2017-04-26 This volume contains original research and innovative analyses that deepen our understanding of figurative thought and language The selected papers focus on the multi faceted aspect of figuration its function in thought and its impact on areas of grammar and communication Key topics explored include metaphor metonymy and their relationship to each other as well as the less studied figure of hyperbole and its relation to the fundamental figures of metaphor and metonymy Collectively the papers examine the pragmatic reasoning processes triggered by figurative thought the lexicogrammatical motivations and or

constraints on figurative language the impact of deeply entrenched figurative thought on the lexicon of natural languages the cultural origins of figurative thought and the psycholinguistic motivations for figuration The comprehensive treatment of these issues is fundamental for future research on figurative thought and language particularly on questions of universality vs specificity of figuration the impact of figuration on constructions cross linguistic comparisons of figurative language and cognitive pragmatic approaches to figurative meaning From Linguistics to Hermeneutics Pierre Van Hecke, 2010-12-07

Linguistics and hermeneutics are often regarded as two mutually exclusive scholarly disciplines Recent decades however have witnessed the rise of linguistic approaches that take meaning back to the heart of their inquiry and can be fruitful for textual interpretation This book applies the insights of two such approaches i e functional grammar and cognitive semantics to the study of Biblical Hebrew with a specific focus on Job 12-14 The result is two fold The study offers a detailed linguistic analysis providing many new insights in the linguistic peculiarities of the text and Biblical Hebrew in general Moreover it proposes a fresh exegetical reading of Job's longest and central speech in the book **Drawing Attention to Metaphor** Camilla Di Biase-Dyson, Markus Egg, 2020-04-15

The communicative act of drawing attention to metaphor is a relatively recent topic in metaphor studies and one that has remained contentious from a cognitive perspective This book brings philologists of ancient languages together with metaphor experts from several modalities to interrogate whether ancient and modern texts and languages draw attention to figurative tropes in similar ways In this way the diachronic multimodal and pluridisciplinary contributions to this volume critically review the theoretical frameworks underpinning metaphor marking and metaphor analysis from a completely new empirical basis The Language of Pain Chrysoula Lascaridou, 2007

How is the universal yet private and subjective experience of pain talked about by different people in everyday encounters What does the analysis of pain related lexico phraseological choices grammatical structures and linguistic metaphors reveal as to how pain is perceived and experienced Are pain utterances primarily used to express or to describe this experiential domain This is the first book that investigates such questions from both a functional and a cognitive perspective it combines two converging usage based theoretical models in a systematic linguistic inquiry of the construal of pain in everyday language This work is based on a specialised electronic corpus of Greek naturally occurring dialogues in a health care context the underlying assumption being that in the absence of factual evidence intuition about language cannot reliably detect or predict patterns of usage Comparing Greek with English data this book significantly contributes to the development of this research field cross linguistically *Exploring Functional-Cognitive Space* Christopher S. Butler, Francisco González-García, 2014-08-28

This book intended primarily for researchers and advanced students expands greatly on previous work by the authors exploring the topography of the multidimensional functional cognitive space within which functional cognitive and or constructionist approaches to language can be located The analysis covers a broad range of 16 such approaches with some additional references to Chomskyan minimalism and is based on 58 questionnaire items each

rated by 29 experts on particular models for their importance in the model concerned These ratings are analysed statistically to reveal overall patterns of dissimilarity across models The questionnaire ratings and experts comments are then used together with the authors close reading of the literature in detailed discussion leading to a final dichotomous rating for each feature in each model the results again being analysed statistically The final chapter presents the overall conclusions and suggests how existing collaborations between approaches could be strengthened and new ones created in future research Exploring Functional Cognitive Space has been awarded the 2016 prize of the Spanish Association for Applied Linguistics Asociaci n Espa ola de Ling stica Aplicada AESLA for work by experienced researchers **Agile Project Management and**

Complexity Czesław Mesjasz, Katarzyna Bartusik, Tomasz Małkus, Mariusz Sołtysik, 2022-04-06 This research monograph presents an interdisciplinary study of the impact and current status of applications of complexity related concepts in the early stages of development of Agile Project Management APM The results serve as an introduction for exploring more profound relations between complexity related ideas and APM in the future The increasing complexity of software projects and their environment in the 1990s constituted the main determinants of the development of the family of methodological frameworks called Agile Project Management Development of APM has been shaped by a broadly defined area of research called complexity science or complexity theory based on complex adaptive systems CAS and on their characteristics Complexity chaos the edge of chaos emerging properties non linearity self organization etc In the 21st century due to the expansion of Agile beyond software development the challenges deriving from the complexity of projects and the environment are even more urgent or compelling Such phenomena demand more profound inter and multi disciplinary studies This book examines the impact of applications of complexity related ideas deriving from intuitive complexity and from complexity science in the early stages of development of the Agile methodological frameworks in project management and considers the current status of those applications It questions the usefulness of those applications for the practice and theory of APM and then proposes a conceptual framework for further theoretical studies and several ways of improvement and refinement of the Agile Project Management necessary to deal with broadly defined complexity in project management Requiring a medium level knowledge of complexity studies and knowledge of project management this book is written for the research community studying the links between the various methodological frameworks included in APM and complexity related ideas It will also be interesting for studies of the impact of complexity on modern management and for master s students on IT and management courses Cognitive Processing in Second Language Acquisition Martin Pütz, Laura Sicola, 2010 This edited volume represents state of the field research linking cognition and second language acquisition reflecting the experience of the learner when engaged in noticing input output processing retrieval and even attrition of target forms Contributions are both theoretical and practical describing a variety of L1 L2 and L3 combinations from around the world as observed in spoken written and computer mediated contexts The book relates conditions of language task

medium or environment to how learners make decisions about language with discussions about the application or efficacy of these conditions on linguistic success and development and pedagogical implications

Asymmetric Events

Barbara Lewandowska-Tomaszczyk, 2008-05-15 The book introduces the concept of asymmetric events an important concept in language and cognition which for the first time in linguistic literature is identified in a more systematic way and analyzed in a number of different languages including typologically or genetically unrelated ones Asymmetric events are two or more events of unequal status in an utterance and papers in the volume present ways in which a linguistic description of main events in a sentence is different morphologically syntactically discursively from a description of backgrounded events The prototypical asymmetries involving perception cognition and language are identified in subordination nominalization and

modification of various kinds but they extend to coordinate structures serial verbs spatial language and viewing arrangement as well as part whole relations The perspective is broadly cognitive and functional the authors use different though complementing methodologies some include corpus data and the asymmetries are shown to have a variety of stylistic and ideological implications An in depth analysis of manifold asymmetries in structure and function of diverse languages makes this volume of interest to linguists of different persuasion philosophers cognitive researchers discourse analysts and students of language and cognition

Metaphor in Psychotherapy Dennis Tay, 2013-07-25 This book represents a bold attempt to address contemporary issues in both metaphor and psychotherapy research On one hand metaphor research is increasingly concerned not just with describing metaphors in discourse but how they could be used more adroitly in purposive real world contexts such as psychotherapy On the other hand while a growing number of mental health professionals believe that metaphors contribute in some way to the psychotherapy process their ability and willingness to use metaphors might be compromised by a relative unfamiliarity with the various nuanced aspects of metaphor theory The present analysis of metaphors in authentic psychotherapeutic talk brings these theoretical aspects to the forefront and suggests how they can be applied to enhance the use of communication of metaphors in psychotherapy It should be of interest to metaphor researchers mental health professionals and discourse analysts in general

Identification Gerard J. Steen, Aletta G. Dorst, J. Berenike Herrmann, Anna A. Kaal, Tryntje Pasma, Tina Krennmayr, 2010-06-23 This book presents a complete method for the identification of metaphor in language at the level of word use It is based on extensive methodological and empirical corpus linguistic research in two languages English and Dutch The method is formulated as an explicit manual of instructions covering one chapter the method being a development and refinement of the popular MIP procedure presented by the Pragglejaz Group in 2007 The extended version is called MIPVU as it was developed at VU University Amsterdam Its application is demonstrated in five case studies addressing metaphor in English news texts conversations fiction and academic texts and Dutch news texts and conversations Two methodological chapters follow reporting a series of successful reliability tests and a series of post hoc troubleshooting exercises The final chapter presents a first empirical analysis of the findings and shows what this type of methodological attention can mean for research and theory
