## Chapter 1

# Overview of Financial Statement Analysis

### REVIEW

Financial statement analysis is one important step in business analysis. Business analysis is the process of evaluating a company's economic prospects and risks. This includes analyzing a company's business environment, its strategies, and its financial position and performance. Business analysis is useful in a wide range of business decisions such as investing in equity or debt securities, extending credit through short or long term loans, valuing a business in an initial public offering (IPO), and evaluating restructurings including mergers, acquisitions, and divestitures. Financial statement analysis is the application of analytical tools and techniques to general-purpose financial statements and related data to derive estimates and inferences useful in business analysis. Financial statement analysis reduces one's reliance on hunches, guesses, and intuition for business decisions. This chapter describes business analysis and the role of financial statement analysis. The chapter also introduces financial statements and explains how they reflect underlying business activities. Several tools and techniques of financial statement analysis are also introduced. Application of these tools and techniques is illustrated in a preliminary business analysis of Dell.

*The Eight Per Cent Solution* Nikhil Gupta, 2023-08-26 IT IS A WONDERFUL STORY but time after time in the decades since Independence it stops short midway India is poised for growth The GDP is rising The lumbering elephant is turning into a tiger But the leap doesn't quite happen There has been enormous change but alongside the problems have also been rising And for a large mass of people it remains a future of brutal poverty If India is to meet the needs of its people it has to consistently generate enough jobs for the millions of youth who enter the job market every year and build up an infrastructure in which there is enough to go round for education health and security of its population Nikhil Gupta chief economist with a leading brokerage has been a close observer of the policies and factors that help India grow As he puts it an economy consists of four participants households corporate government and external and just three activities consumption savings investment and external trade However the lack of attention to the finances of the household sector and the unlisted corporate sector is shocking As too the gap between the real and the financial economy It is these and other gaps in this complicated scenario that Gupta tries to bridge The Eight per cent Solution presents Gupta's version of a grand unified theory that brings in the neglected but important elements to show how India can finally achieve that elusive target of a higher phase of growth
