either a sovereign nation or a province of the People's Republic of China. Copper argues that Taiwan's very rapid and successful democratization suggests Taiwan should be independent and separate from China while economic links between Taiwan and China indicate the opposite. New to the sixth edition is enhanced coverage of the issues of immigration, the impact of having the world's lowest birthrate, China's economic and military rise and America's decline, Taiwan's relations with China, the United States and Japan, and the KMT's Nationalist Party return to power. The new edition will also examine the implications of the 2012 presidential election. A selected bibliography guides students in further research.

Taiwan's Presidents John F. Copper, 2024-08-05 This book profiles Taiwan's six key presidents: Chiang Kai-shek, Chiang Ching-kuo, Lee Teng-hui, Chen Shui-bian, Ma Ying-jeou, and Tsai Ing-wen, focusing on politics, economics, elections, successes and failures in office, popularity, and democratization. By analyzing criteria of the six presidents' leadership, such as management of crises, advancing democracy, stewardship of the economy, charisma, corruption, and handling of foreign relations, especially with China and the U.S., John F. Copper goes on to rank the presidents and predicts trends and difficulties that future presidents will face. Special attention is paid to relations with the U.S., acknowledging the U.S. as Taiwan's political and economic model as well as its being Taiwan's protector in the context of China's claim to Taiwan. As an assessment of these six political leaders as well as a study of Taiwan's political system, this book will appeal to students and scholars of Taiwan political science and international relations.

World on the Brink Dmitri Alperovitch, Garrett M. Graff, 2024-04-30 NATIONAL BESTSELLER In this excellent Economist book, the national security expert who predicted Putin's invasion of Ukraine argues that Xi Jinping is preparing to conquer Taiwan with dire global stakes if he is not deterred. We are fully in the midst of Cold War II; this time with China, Taiwan is a new West Berlin, a perilous strategic flashpoint where localized events could trigger a devastating war between nuclear powers. But this outcome is far from inevitable. Laying out the grand strategy for the United States and allies to avoid this fate, the highly respected security analyst Dmitri Alperovitch reveals key actions that could enable America to win the race for the twenty-first century. This sharp, timely book is the essential blueprint for preventing a catastrophe.

A World of Turmoil Stephen J. Hartnett, 2021-06-01 The United States, the People's Republic of China, and Taiwan have danced on the knife's edge of war for more than seventy years. A work of sweeping historical vision, *A World of Turmoil* offers case studies of five critical moments: the end of World War II and the start of the Long Cold War, the almost nuclear war over the Quemoy Islands in 1954-1955, the d'Amato deceptions and denials surrounding the 1972 Shanghai Communiqué, the Taiwan Strait Crisis of 1995-1996, and the rise of postcolonial nationalism in contemporary Taiwan. Diagnosing the communication dispositions that structured these events reveals that leaders in all three nations have fallen back on crippling stereotypes and self-serving denials in their diplomacy. The first communication-based study of its kind, this book merges history, rhetorical criticism, and advocacy in a tour de force of international scholarship. By mapping the history of miscommunication between the United States, China, and Taiwan, this provocative study shows where and how our

entwined relationships have gone wrong clearing the way for renewed dialogue enhanced trust and new understandings

Contemporary History of the Chinese Zheng Ann L. Silverberg, 2022-12-12 A Contemporary History of the Chinese Zheng traces the twentieth and twenty first century development of an important Chinese musical instrument in greater China The zheng was transformed over the course of the twentieth century becoming a solo instrument with virtuosic capacity In the past the zheng had appeared in small instrumental ensembles and supplied improvised accompaniments to song Zheng music became a means of nation building and was eventually promoted as a marker of Chinese identity in Hong Kong Ann L Silverberg uses evidence from the greater China area to show how the narrative history of the zheng created on the mainland did not represent zheng music as it had been in the past Silverberg ultimately argues that the zheng's older repertory was poorly represented by efforts to collect and promote zheng music in the twentieth century This book contends that the restored traditional Chinese music created and promulgated from the 1920s forward and solo zheng music in particular is a hybrid of Chinese essence Western means that essentially obscures rather than reveals tradition Ann Silverberg's book provides a history of the Chinese zheng zither with a focus on the rise of solo music since the mid twentieth century across the three sites of mainland China Hong Kong and Taiwan Existing English language studies mostly omit consideration of

Hong Kong and Taiwan so this account enriches current perspectives on the multiplicities of Chinese musical history and identity Jonathan Stock University College Cork Ireland Professor Ann Silverberg's insights and approach are long awaited in the studies of Chinese music I am particularly impressed by her coverage of the situation in Hong Kong and Taiwan This book is a wonderful contribution to zheng music It also inspires and enhances the studies of other Chinese musical instruments and Chinese traditional music Yu Siu Wah independent scholar **The Cold War** Spencer C.

Korean War Paul M. Edwards,2013-08-29 When in 1950 the United Nations called upon its members to provide aid to South Korea more than forty nations responded Some of these sent troops which fought under the United Nations Command some sent commodities and medical supplies Some nations offered moral and political support but for a variety of reasons were not able to send aid This book looks at the nations involved what was behind their willingness to provide troops or aid or what prevented them from doing so The military contribution of the nations involved is discussed The combination of troops and their individual needs made the logistics of this enterprise difficult but in the end troops from 17 nations fought together to defend the freedom of South Korea **Foreign Policy Making in Taiwan** Dennis V. Hickey,2006-12-05 Following President Chen Shui bian's victory in the controversial 2004 presidential election this book examines the future direction of

Taiwan's foreign policy focusing on the internal and external forces that influence and shape the country's foreign policy decisions today. The author suggests that four levels of analysis—the international system, governmental structure, societal forces, and individual factors—pose some explanatory value when seeking to understand Taipei's foreign policy behaviour. Taiwan's foreign policy decision making remains an extremely complex process involving many important variables. However, the author's detailed analysis reveals that external factors, particularly seismic shifts in global politics and the role of China and the US, have had an extraordinary degree of influence over the island's foreign relations. This book highlights these factors as important considerations that continue to play a critical role in shaping Taiwan's foreign policy. Providing a clear analysis of the dynamics of Taiwan's foreign policy, *Foreign Policy Making in Taiwan* is an important addition to the literature on Taiwan and will be essential reading for followers of Chinese politics, comparative politics, and foreign policy analysis.

Playing Our Game Edward S. Steinfeld, 2010-08-05. Conventional wisdom holds that China's burgeoning economic power has reduced the United States to little more than a customer of Beijing. Not so, writes Edward Steinfeld. In this fascinating book, Steinfeld asserts that China's growth actually enhances Western commercial supremacy. By seeking to realize its dream of modernization by integrating itself into the Western economic order, China is playing by our rules, reinforcing the dominance of our companies and regulatory institutions. Indeed, China has in many ways handed over outsourced the remaking of its domestic economy and domestic institutions to foreign companies and foreign rule-making authorities. And even as Chinese companies assemble products for export to the West, the most valuable components for those products come from the West. America's share of global manufacturing by value has actually increased since 1990. Within China, the R&D centers established by Western companies attract the country's best scientists and engineers and harness that talent to global rather than indigenous Chinese innovation efforts. In short, China's economic emergence is good for America.
