The book is structured to take the analyst step by step through the stages of any trace analysis. The approach is general, being broken down only into types of analyte. Additional chapters explain the application of groups of techniques to each analyte type. Each section contains references to published material which will allow the analyst to obtain further information on specific topics. Throughout the book the analyst is reminded of pitfalls which lead to unreliable results. This new book therefore offers invaluable advice to analysts in all areas and at all levels, providing practical expert advice on methodology. It will prove indispensable as a single comprehensive bench guide for analysts in university, college and industrial laboratories.

Conjugated Linoleic Acids and Conjugated Vegetable Oils Bert Sels, An Philippaerts, 2014-07-11. Conjugated linoleic acids (CLA) isomers of linoleic acid, a compound derived from meat and dairy products.
