*Alternative Propulsion Systems for Automobiles* Cornel Stan, Giovanni Cipolla, 2008      *André Lefebvre, and the Cars He Created at Voisin and Citroën* Gijbert-Paul Berk, 2011-11 Together with his colleagues at Citroën André Lefebvre created the Traction Avant 1934 the TUB 1939 Citroën's first front wheel drive utility van that was succeeded by the H and HY vans 1947 the Deux Chevaux 1948 and last but not least the DS 1955 From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record breaking automobiles for Voisin He even drove some these cars in races and record attempts It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer The experience gained during that period gave him the self confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed first he convinced André Citroën later Pierre Michelin then Pierre Jules Boulanger and finally Robert Puiseux and Pierre Bercot His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century The fact that most present day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators That is why it is amazing that so little is known about this fascinating and brilliant engineer This book was written in order to remedy that and to pay tribute to André Lefebvre the passionate pioneer who left car enthusiasts around the world such an important heritage      Motor Cycling and Motoring ,1987      **NSU Ro80 - The Complete Story** Martin Buckley, 2023-02-14 Launched in 1967 the NSU Ro80 had modern aerodynamic styling a technologically advanced Wankel rotary engine and was voted Car of the Year in 1968 However after the initial positive reception the car developed a reputation for unreliability with problems arising as early as 15 000 miles and many vehicles required a rebuilt engine before 30 000 miles Despite the company resolving these reliability issues in both existing and new vehicles and offering a generous warranty the damage to the car's reputation was done The NSU Ro80 is the most celebrated motoring lost cause of the second half of the twentieth century outranking the likes of the Edsel and the DeLorean because unlike those statements of misplaced optimism and ego it was a good car Not just good the NSU Ro80 is one of the great saloons Launched in September 1967 the Ro80 was an all new four door five seater from a West German company that post war had never made anything other than economy runabouts motorcycles and mopeds That alone should have been enough of a risk but this was also the world's first purpose built Wankel engined family saloon This compact refined and elegantly simple power unit was the first really new concept in the realm of internal combustion engines to achieve mass production for ninety years A car like the Ro80 could only really have come from Germany where there was a passion for research and a pride in engineering not found elsewhere in Europe With front wheel drive superb power steering and four wheel disc brakes the car had top handling and driver appeal Quite simply it was a masterpiece considered by many to be the finest vehicle of its type in the world But with one fatal flaw its engine With over 300 archive photographs drawings and diagrams this book tells the story of the NSU      Autocar & Motor ,1993-11      *The Future of the UK Motor Industry* Krish N.
