Pettit, 2019-09-26 Today the world's largest economies and corporations trade in data and its products to generate value in new disruptive markets Within these markets vast streams of data are often inaccessible or untapped and controlled by powerful monopolies Counter to this exclusive use of data is a promising world wide open data movement promoting freely accessible information to share reuse and redistribute The provision and application of open data has enormous potential to transform exclusive technocratic smart cities into inclusive and responsive open cities. This book argues that those who contribute urban data should benefit from its production Like the city itself the information landscape is a public asset produced through collective effort attention and resources People produce data through their engagement with the city creating digital footprints through social medial mobility applications and city sensors By opening up data there is potential to generate greater value by supporting unforeseen collaborations spontaneous urban innovations and solutions and improved decision making insights Yet achieving more open cities is made challenging by conflicting desires for urban anonymity sociability privacy and transparency This book engages with these issues through a variety of critical perspectives and presents strategies tools and case studies that enable this transformation Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen ,1996 The Territorial Future of the City Giovanni Maciocco, 2009-06-12 The volume brings together contributions by both leading scholars and young academics with a particular experience in the urban potential of the territory in situations not necessarily linked to the dense metropolis its compact form or to city sprawl What brings these scholars together is their common reflection on this central theme though from varied disciplinary and experimental backgrounds Leading academics like A Mela Prof of Territory and Environment Sociology University of Turin S Tagliagambe Prof of Philosophy and Science University of Sassari G Maciocco Dean of the Faculty of Architecture and Planning Alghero Italy and P Pittaluga have accumulated long time experience in developing environmental approaches within Philosophy Sciences Environmental Planning and Art Researchers like I Doucet N Janssens and K Boon in their turn bring in approaches related to specific European contexts Vocabularies for an **Urbanising Planet: Theory Building through Comparison** Christian Schmid, Monika Streule, 2023-10-04 Cartography as an instrument for the analysis of urbanisation processes.
