**Managing Nongovernmental Organizations** Frederik Claeyé, 2014-03-26 The idea that international development aid needs to be better managed and coordinated gained currency in the early 1990s The increasing emphasis on management has resulted in the present vogue of managing for development results as one of the central tenets in the discourse on international aid But how appropriate are these ideas tools and techniques for non governmental development organizations NGOs and how much does geographic context matter Examining the current debate on aid effectiveness and the role of NGOs in contributing to it this book highlights the critical importance of understanding how the global and the local interact to increase aid efficacy and develop more culturally astute ways of managing NGOs With a focus on NGOs active in sub Saharan Africa as case studies author Frederik Claeyé demonstrates that NGOs are not mere passive recipients of management knowledge and practices emanating from the global governance structure of international aid but actively engage with these ideas and practices to translate and rework them through a local cultural lens This process results in the emergence of unique hybrid management systems that combine the pressure to become more business like with the mission to satisfy the demands of the communities they serve

**Black Marxism, Revised and Updated Third Edition** Cedric J. Robinson, 2020-12-16 In this ambitious work first published in 1983 Cedric Robinson demonstrates that efforts to

understand Black people's history of resistance solely through the prism of Marxist theory are incomplete and inaccurate. Marxist analyses tend to presuppose European models of history and experience that downplay the significance of Black people and Black communities as agents of change and resistance. Black radicalism, Robinson argues, must be linked to the traditions of Africa and the unique experiences of Blacks on Western continents, and any analyses of African American history need to acknowledge this. To illustrate his argument, Robinson traces the emergence of Marxist ideology in Europe, the resistance by Blacks in historically oppressive environments, and the influence of both of these traditions on such important twentieth-century Black radical thinkers as W. E. B. Du Bois, C. L. R. James, and Richard Wright. This revised and updated third edition includes a new preface by Tiffany Willoughby Herard and a new foreword by Robin D. G. Kelley.

**Mapping Digital Skills in Cultural and Creative Industries in Italy** Massimiliano Nuccio, Sofia Mogno, 2023-03-29

Digital transformation has profoundly affected organizations and value chains in cultural production at the global level. The volume focuses on this change by looking at the knowledge, skills, and competencies (KSC) of the labor force in the cultural and creative industries (CCI) in Italy. The contribution of the research is twofold. On the one hand, the book offers a detailed map of the KSC of creative and cultural professions and workers; on the other hand, it identifies relevant gaps between supply and demand across different cultural sub-sectors and typologies of workers. The study adopts an original methodology that implements a Natural Language Processing (NLP) approach to the analysis of education experiences and accomplishments contained in CVs. The result of the mapping exercise based on the algorithm shows how managerial and digital skills are increasingly crucial in the CCI in combination with creative skills. The Italian labor market in these industries seems characterized not only by a growing symbiosis between creative, digital, and managerial KSC but also by a convergence of CCI sub-sectors whose boundaries get increasingly blurred and permeable. Finally, comparing the supply and demand of KSC, the book provides managers, practitioners, policymakers, and educational institutions with a comprehensive overview of the new KSC needed in CCI.
