Solomon, Julia Anstey, Liora Wittner, 2021-04-11 It is vitally important for medical students and junior doctors to grasp an understanding of real life medicine. This innovative book of cases shows how a particular presentation may progress and the different complications that may arise and emerge over time, which may be missed by the snapshot in time approach taken by many problem-based volumes. The content reflects the average length of stay for a patient in hospital in which their situation can change in a multitude of ways and the management of chronic conditions may also need to be adapted as complications arise. Demonstrates the real bedside experiences that medical students can expect in whichever simple or complex way that they may present. Cases selected from a range of sub-specialties for comprehensive coverage across the curriculum. Illustrates the complicated progressive problems that will be seen while practicing as a doctor with detailed diagrams and diagnostic imagery to aid understanding. Shows with timepoints how differential diagnoses may change as more information becomes available and new symptoms arise. Describes a typical initial hospital stay and subsequent presentations to the general practitioner and hospital readmission. The Authors: Andrew Solomon BM BCH MA Hons DM FRCP is a Consultant Physician East and North Hertfordshire NHS Trust Stevenage UK. Julia Anstey BSc Hons MBBS is a Foundation Doctor Somerset NHS Foundation Trust Taunton UK. Liora Wittner MBBS BSc is a Resident in Internal Medicine Shamir Medical Centre Be'er Yaakov Israel. With contributions from Priti Dutta MBBS BSc FRCR Consultant Radiologist Royal Free London NHS Foundation Trust London UK.
