

**Piaget (1936):** Intelligence not a fixed trait and **cognitive development** is a process due to **biological maturation and interaction with the environment**.

**Binet Institute (IQ tests)** – Piaget was interested why children gave wrong answers for logical thinking questions. It is this difference that exists in adults and children.

**Fundamental concepts** like number, time, quantity, causality, justice and more – these were **different in children and in adults**.

Young children are not less competent thinkers but **different thinkers compared to adults**.

**Development** (qualitative differences) is different from **learning** (complexity of behaviour and information)
