Classics In Environmental Studies An Overview Of Classic Texts In Environmental Studies Series Environmental Studies:

Classics in Environmental Studies Nicolaas Johannes Maria Nelissen, Leon Klinkers, Jan van der Straaten, 1997 Having established the 35 most significant works in the field of environmental studies the editors have selected the most relevant passage typically about 10 pages to reproduce in full and set in a historical perspective

The SAGE Handbook of Tourism Studies Tazim Jamal, Mike Robinson, 2009-06-18 The strongest overview I have encountered of the scope and the current state of research across all the fields involved in advancing our understanding of tourism For its range of topics depth of analyses and distinction of its contributors nothing is comparable Professor Dean MacCannell University of California Davis The breadth of vision and sweep of accounts is remarkable and range of topics laudable a rare combination of the authoritative the challenging and stimulating Professor Mike Crang Durham University Tourism studies developed as a sub branch of older disciplines in the social sciences such as anthropology sociology and economics and newer applied fields of study in hospitality management civil rights and transport studies This Handbook is a sign of the maturity of the field It provides an essential resource for teachers and students to determine the roots key issues and agenda of tourism studies exploring The evolution and position of tourism studies The relationship of tourism to culture The ecology and economics of tourism Special events and destination management Methodologies of study Tourism and transport Tourism and heritage Tourism and postcolonialism Global tourist business operations Ranging from local to global issues and from questions of management to the ethical dilemmas of tourism this is a comprehensive critically informed constructively organized overview of the field It draws together an inter disciplinary group of contributors who are among the most celebrated names in the field and will be quickly recognized as a landmark in the new and expanding field of tourism studies

Environmental Sociology John Hannigan, 2022-09-09 John Hannigan s definitive textbook offers a distinctive balanced coverage of environmental issues policies and action This revised fourth edition has been expanded and fully updated to explore contemporary developments and issues within global environmental sociology Environmental Sociology reconciles Hannigan s widely cited model of the social construction of environmental problems and controversies which states that incipient environmental issues must be identified researched promoted and persuasively argued in the form of claims with an environmental justice perspective that stresses inequality and threats to local communities For example this new edition explores the interconnections between indigenous communities and environmental activists via a study of the difficult relationship between Aboriginal people and environmentalists in Australia The updated fourth edition also discusses new direct action protest groups such as Extinction Rebellion who have reframed the discourse around the climate emergency using apocalyptic language and imagery Environmental Sociology also signposts exciting new directions for future research The fourth edition re interrogates the classical roots of environmental theory with a focus of the work of Alexander von

Humboldt Hannigan also asserts the need for environmental sociologists to turn their attention to The Forgotten Ocean arguing that the discipline should incorporate cutting edge concepts such as marine justice striated space and volumetrics Environmental Sociology is a key text for students and researchers in environmental studies political ecology social geography and environmental sociology

The New Environmentalism? Davide Torsello, 2016-03-03 Drawing on rich ethnographic work in both Eastern and Western Europe The New Environmentalism presents a range of case studies to explore the impact of corruption in EU funded structural development projects With detailed analyses of the forms and contexts of environmentalism the book reveals the manner in which corruption is generated by the planning and implementation procedures of the projects demonstrating in each case that environmental movements emerge as by products of these processes using corruption as part of a discourse employed in support of their action against political regional and state institutions as well as to communicate their goals to local citizens Shedding light on the ways in which revelations about corruption are adopted as a means to fostering civic participation in environmental movements and influencing institutional trust this book contributes to our understanding of the loss of legitimacy and trust in local and global political institutions Comparative in approach The New Environmentalism provides new insights into the emergence of strong civic movements at local and trans local levels in resistance to citizens sense of increasing alienation from political participation and decision making As such it will be of interest to anthropologists sociologists and political scientists concerned with questions of legitimacy corruption and activism

The State of the Earth Paul K. Conkin, 2006-12-15 An assessment of where we are where we re headed and what we need to do before it s too late Instructive well researched and easy to read John T Ackerman Strategic Studies Quarterly This era of staggering scientific and technological innovations with major changes in agriculture manufacturing commerce and communications seems to document unparalleled human achievement Yet when we examine the long term implications it becomes clear that the delicate environmental balance that sustains life on this planet is under serious threat and the past century may be remembered not as a period of great progress but as one marked by unrestrained consumption and failure to come close to a sustainable use of the earth s limited natural resources In The State of the Earth noted historian Paul K Conkin provides a comprehensive analysis of the many environmental hazards that humans must face in this still young century Our activities have threatened the survival of many plants and animals created scarcities in cultivatable soils and water needed for irrigation used up a large share of fossil fuels polluted air and water and most likely created conditions that will lead to devastating climate changes This is an invaluable

resource for those who desire a broad yet thorough and scientifically informed introduction to present environmental challenges *Information Resources in Toxicology* P.J. Bert Hakkinen, Asish Mohapatra, Steven G. G. Gilbert, 2009-08-19 This latest version of Information Resources in Toxicology IRT continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization review and commentary on the information infrastructure of the field This book is a unique wide ranging international annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment Thoroughly updated the current edition analyzes technological changes and is rife with online tools and links to Web sites IRT IV is highly structured providing easy access to its information Among the hot topics covered are Disaster Preparedness and Management Nanotechnology Omics the Precautionary Principle Risk Assessment and Biological Chemical and Radioactive Terrorism and Warfare are among the designated International in scope with contributions from over 30 countries Numerous key references and relevant Web links Concise narratives about toxicologic sub disciplines Valuable appendices such as the IUPAC Glossary of Terms in Toxicology Authored by experts in their respective sub disciplines within toxicology **Green Liberalism** Marcel Wissenburg, 2013-11-05 This is an agenda setting exploration of the relationship between green politics and liberal ideology Ecological problems provide unique challenges for liberal democracies This challenge is examined by the author who aims to fill the gap between short term ecological modernization and the politically infeasible longer term utopian approaches *Feminist Perspectives on Environment and Society* Beate Littig, 2014-06-06 For courses in Environmental studies Environmental Sociology Environmental geography and Development studies Women s studies and Women s issues options on a wide variety of degree courses Combining theory with practice this concise accessible text provides a comprehensive introduction to the concepts theories and results of environmental sociology from a feminist perspective Within an international context it portrays in full the different feminist perspectives on environment and society which are marginalized in mainstream research and shows how the feminist critique on environmental sociology contributes to a more general feminist critique of society Part of the Feminist Perspectives Series providing stimulating introductions to key feminist topics and debates written by well known experienced teachers in each field Decentralization in Environmental Governance Christian Zuidema, 2016-10-04 Decentralization in Environmental Governance is a critical reflection on the dangers and risks of governance renewal warning against one sided criticism on traditional command and control approaches to planning The book formulates the arguments that support when and how governance renewable might be pursued but this attempt is not just meant for practitioners and scholars interested in governance renewal It is also useful for those interested in the challenge of navigating a plural landscape of diverse planning approaches which are each rooted in contrasting theoretical and philosophical positions The book develops a strategy for making argued choices between alternative planning approaches despite their theoretical and philosophical positions It does so by revitalizing the idea that

we can contingently relate alternative planning approaches to the circumstances encountered It is an idea traced to contingency studies of the mid and late 20th century reinterpreted here within a planning landscape dominated by notions of uncertainty complexity and socially constructed knowledge This approach called Post contingency is both a theoretical investigation of arguments for navigating the theoretical plurality we face and an empirical study into renewing environmental governance Next to its theoretical ambitions Decentralization in Environmental Governance is practical in offering a constructive critique on current processes of governance renewal in European environmental governance The Road Towards DemocraCity Marco Carcea,2021-08-09 This book discusses the challenges faced by the homo resaliens and his need for a transition to a more sustainable social economic and environmental system It fills a gap in the existing literature and provides a new perspective by changing the etymology of the word resilience no more resiliere but resalio By comparing and analysing the relevant literature the author has coined the term homo resaliens resilient man in contrast to the failure of the homo oeconomicus the corruption of the homo politicus the incompleteness of homo sustinens and the limits of homo ecologicus Opening a new debate in which the role of academia and res publica are fundamental to safeguard human communities and future generations this book will greatly assist governments that wish to understand the socio political and economic implication of resilience in terms of social inclusiveness and long term social and environmental sustainability

Tourism Studies and the Social Sciences Andrew Holden,2004-06-01 Based upon a social science approach to understanding the significance of tourism in contemporary society Andrew Holden s fascinating book highlights tourism as a multidisciplinary area of study with rich and varied theoretical underpinnings Here Holden introduces social science disciplines and applies relevant theories to the understanding of tourism He investigates how the economic and political structures of society influence the manifestation of tourism at a global level and subsequently considers a variety of topical issues including citizenship and social exclusion tourism as a form of trade consumerism the consequences of tourism and feminism and ethics Each chapter includes a brief introductory summary of the discipline a critique of its main theories and concepts which have relevance to tourism a discussion of how the theories and concepts have been applied to tourism using cases and examples international case studies and examples Punctuated with study and teaching aids chapter summaries and think points to encourage reflection this excellent broad ranging textbook provides a wider understanding of tourism s role in society

Introduction to Environmental Physics Peter Hughes,N.J. Mason,2001-05-29 The changing climate and its affect on all of us is becoming increasingly apparent ozone depletion hurricanes floods and extreme weather behaviour Introduction to Environmental Physics challenges the way we think about how and why environmental change occurs This authoritative book aims to cover some of the more common and popular topics addressed in physics of the earth physics of the environment and environmental physics courses It provides an essentially non mathematical treatment suitable for a first year undergraduate level course The principle topics covered are the physics of the built environment the physics

of human survival energy for living environmental health revealing the planet the sun and the atmosphere the biosphere the global climate and climate change With contributions from well respected experts on the subject this textbook contains a summary references and questions at the end of each chapter This is an ideal textbook for first year undergraduates in a variety of courses particularly physical geography physics environmental and earth science with worked examples illustrating principles and vignettes from scientists who have made a significant contribution to the field enlightening the student along the way As the authors say in the preface to this book At the outset of the 21st century there are many environmental challenges to be wrestled with and though the environment is changing the Physics is not **Engaging with**

Environmental Education through the Language Arts Nicholas McGuinn,Amanda Naylor,2024-11-04 This creative volume demonstrates the urgent importance of engaging students cognitively and affectively with the climate crisis and environmental education underpinning the vital role the language arts play in expanding this engagement for a better future Moving beyond the basic modalities of English chapters written by an internationally diverse group of contributors advocate for the integration of language arts with environmental education through broad representation of creative subdisciplines drama visual literacy philosophy poetry student voice and more These subdisciplines are explored to suggest the context in which environmental degradation forest ecologies carbon literacy and indigenous knowledges are taught further helping students to develop a comprehensive view of how they can effect change Ultimately the book makes a compelling argument by emphasising the significance of interdisciplinary learning in fostering a holistic understanding of environmental issues This volume will appeal to scholars researchers and postgraduate students in the field of environmental and sustainability education English and literacy language arts and teacher education more broadly Undergraduate students policymakers environmental educators and curriculum designers may also benefit from this volume **The Torah and the Stoics on**

humankind and nature J.J. Boersema,2021-09-06 The environmental problematique is intimately bound up with deep seated human attitudes regarding our relationship with nature Here in the west those attitudes have been shaped to no small degree by the canonical texts of the Bible and the classical philosophers In this book the author re examines some of these seminal texts arguing that what we today know as Christian cosmology is in fact a grafting of classical Greek philosophy onto ancient Israelite thought with certain valuable traditions being all but lost in the process The dietary laws of Leviticus and Deuteronomy in particular still prove surprisingly relevant today Often misread on this point the creation narratives of Genesis can likewise serve as a rich point of departure for examining our attitudes towards the natural world A reappraisal of these sources is necessary and feasible There is no need for an appeal to cosmologies alien to our own culture nor for recourse to New Age beliefs in all their variety **Mexico and the NAFTA Environment Debate** Barbara Hogenboom,1998 The book makes an important contribution to the discussion on the nature and impact of current processes of regionalization and globalization NGOs criticism on Mexico s weak enforcement of environmental policy could not be

ignored or silenced in the NAFTA debate In the end a supplemental environmental agreement was added to the trade agreement a unique event

Unforced Flourishing Thomas Salumets, 2014-06-01 Are we ill suited for this world Among Europe's major contemporary poets Estonia's Jaan Kaplinski offers a rare vision of human advancement and fulfillment the less we intervene the more we flourish But how then can we remain involved in what evolves of its own accord How can we move away from a life forged by human design towards a quietly attentive yet spontaneous responsiveness In *Unforced Flourishing* Thomas Salumets seeks access to Kaplinski's life and work and finds a path to the signature of his thinking He uncovers a man who craves human closeness that few if any can provide a writer drawn towards wordless communication in a world of words signs and symbols who yearns for the sacred in secular times and who detects more richness in nature than in the human imagination Salumets describes Kaplinski as an intellectual attracted to a contrarian sense of self art and culture who searches for his homeland's mystical connections at a time when Estonia firmly aligns with values and modes of thought vastly different from his own What emerges is a mentality firmly rooted in the belief that the greatest risk to human fulfillment results from human beings themselves The first major study in English of one of Eastern Europe's most important literary figures *Unforced Flourishing* details Kaplinski's embrace of that which is undifferentiated intuitive non calculative and natural in the modern world
