Their ability to reason to listen to feel empathy is quite literally flickering Computers and their attendant technologies did not cause all these problems but they are quietly accelerating them In this authoritative and impassioned account of the state of education in America Todd Oppenheimer shows why it does not have to be this way Oppenheimer visited dozens of schools nationwide public and private urban and rural to present the compelling tales that frame this book He consulted with experts read volumes of studies and came to strong and persuasive conclusions that the essentials of learning have been gradually forgotten and that they matter much more than the novelties of technology He argues that every time we computerize a science class or shut down a music program to pay for new hardware we lose sight of what our priority should be enlightened basics Broad in scope and investigative in treatment *The Flickering Mind* will not only contribute to a vital public conversation about what our schools can and should be it will define the debate
