Velde, Koen Bostoen, Derek Nurse, Gérard Philippson, 2019-01-30 Written by an international team of experts this comprehensive volume presents grammatical analyses of individual Bantu languages comparative studies of their main phonetic phonological and grammatical characteristics and overview chapters on their history and classification It is estimated that some 300 to 350 million people or one in three Africans are Bantu speakers Van de Velde and Bostoen bring together their linguistic expertise to produce a volume that builds on Nurse and Philippson's first edition The Bantu Languages 2nd edition is divided into two parts Part 1 contains 11 comparative chapters and Part 2 provides grammar sketches of 12 individual Bantu languages some of which were previously undescribed The grammar sketches follow a general template that allows for easy comparison Thoroughly revised and updated to include more language descriptions and the latest comparative insights New to this edition new chapters on syntax tone reconstruction and language contact 12 new sketch grammars thoroughly updated chapters on phonetics aspect tense mood and classification exhaustive catalogue of known languages with essential references This unique resource remains the ideal reference for advanced undergraduate and postgraduate students of Bantu linguistics and languages It will be of interest to researchers and anyone with an interest in historical linguistics linguistic typology and grammatical analysis *Nominal Classification* Marcin Kilarski, 2013-12-18 This book offers the first comprehensive survey of the study of gender and classifiers throughout the history of Western linguistics Based on an analysis of over 200 genetically and typologically diverse languages the author shows that these seemingly arbitrary and redundant categories play in fact a central role in the lexicon grammar and the organization of discourse As a result the often contradictory approaches to their functionality and semantic motivation encapsulate the evolving conceptions of such issues as cognitive and cultural correlates of linguistic structure the diverse functions of grammatical categories linguistic complexity agreement phenomena and the interplay between lexicon and grammar The combination of a typological and historiographic perspective adopted here allows the reader to appreciate the detail and insight of earlier supposedly prescientific accounts in light of the data now available and to examine contemporary discussions in the context of prevailing conceptions in the study of language at different points in its history since antiquity *Form und Struktur in der Sprache* Armin R. Bachmann, Katja Himstedt, 2010 The Oxford Handbook of African Languages Rainer Vossen, Gerrit Jan Dimmendaal, 2020 This book provides a comprehensive overview of current research in African languages drawing on insights from anthropological linguistics typology historical and comparative linguistics and sociolinguistics It covers a wide range of topics from grammatical sketches of individual languages to sociocultural and extralinguistic issues **Concise Encyclopedia of Languages of the World**, 2010-04-06 Concise Encyclopedia of Languages of the World is an authoritative single volume reference resource comprehensively describing the major languages and language families of the world It will provide full descriptions of the phonology semantics morphology and syntax of the world's major languages giving insights into their structure history and development sounds meaning structure

Cross-Categorial Classification Serge Sagna, 2022-03-07 Languages in which non finite verbs infinitives gerunds etc are classified using the same linguistic means as nouns are rare This typologically unusual phenomenon is found in some Atlantic Niger Congo languages including Jola languages like Eegimaa Fogny and Kwatay where several different noun class gender prefixes NCPs are used to classify both nouns and verbs In this book it is argued following Sagna 2008 that these parallel morphosyntactic classifications in the nominal domain and verbal domains also reflect parallel semantic categorisation of entities and events The main topics investigated in this book are word class flexibility between nouns and verbs non finiteness noun class gender where morphological classes are analysed separately from agreement classes and the semantic principles underlying the categorisation of entities and events One of the central findings proposed in this book is that instances of NCP alternations on non finite verbs reflect strategies of event delimitation This book will be of interest to

scholars investigating parts of speech systems finiteness systems of nominal and verbal classification and linguistic categorization
