Foundation Doctors as it encourages application of investigation results to clinical decision making **Data Interpretation for Medical Students** Paul Hamilton, 2006 This book is written for all medical students and is ideal for OSCE practice during ward rounds and clinical years BOOK COVER

Data Interpretation for Medical Students Paul Hamilton K., Ian Bickle C., 2017 *300 Single Best Answers In Clinical Medicine* George Collins, James Davis, Oscar Swift, 2014-09-04 This book is a question book that offers single best answers SBA to 300 questions related to topics in general medicine In order to further enhance knowledge and understanding detailed answers have been included This book is designed as both a revision and learning aid with questions being set in a mock examination format which can be completed under timed conditions The primary target audience of this book is clinical medical students who are revising for examinations However questions have been planned in a way that a fairly large secondary target audience will be reached as well This includes students who are transitioning from pre clinical to clinical As recently qualified medical graduates who have had the option of both online and book based questions the authors feel that students often prefer a Single Best Answers book that aids them in advancing their medical knowledge rather than online question banks which can often have very repetitive and one dimensional

questions Having questions in paper format replicates examination conditions better than online question banks and therefore offers a more realistic revision experience In addition though SBAs are becoming increasingly more common as an examination style with medical schools there are very few SBA question books available As such medical students will find this book highly useful in the preparation for their examinations

100 Cases for Medical Data Interpretation David Howlett, Nicola Gainsborough, 2013-01-22 Data interpretation questions based on clinical cases are a popular means of testing medical students both during undergraduate studies and as an element of finals examinations Written by a small team of authors with extensive teaching experience 100 Cases in Medical Data Interpretation provides invaluable guidance from lecturers who understand from personal experience that detailed and accurate explanations are the key to successful revision This book presents 100 cases arranged by specialty area radiology clinical chemistry haematology and cardiology as well as a random section of miscellaneous cases Questions accompanying each case prompt the reader to consider how the data presented might be correctly understood A clear discussion of how the correct answer was reached with boxed highlights and bullet lists of key points makes this book an excellent learning aid during all stages of clinical studies and particularly while preparing for medical finals

Complete Data Interpretation for the MRCP S. Hughes, 2001 A book of approximately 100 questions based on the interpretation of data from all the commonly used tests in clinical medicine The questions will be ordered by system and within that by test for example the respiratory system questions are based on lung function and flow volume curves The book's unique feature is that it will be fully comprehensive including examples questions on all the conditions that can be diagnosed using each particular investigation

300 Single Best Answer Questions for Medical and Surgical Finals Satyen Gohil, 2007 The questions are divided into two sections 100 scenario based questions present clinical vignettes with questions to test students knowledge within a specific context and 200 knowledge based questions offering a wide mix and variety of questions encompassing all of the major medical and surgical specialties Detailed answers and explanations will help to develop students learning and understanding
