Internationalizing the University Yvonne Turner, Sue Robson, 2008-03-10 Globalization is changing the face of Higher Education across the world Academics and students today are internationally mobiles and unprecedented numbers of international exchanges are cross border education projects are being developed The implications for individual universities are significant international students can bring much needed revenues to boost university coffers and stimulate university classrooms but they also have high expectations and demands This book discusses the implications for those involved in managing the organizational processes and those designing programmes and supporting the student experience A key concern in the text is that of reciprocal internationalization the importance for universities to develop within an internationally integrated environment rather than as national universities which accommodate the needs of people from other countries into their pre existing practices The emphasis throughout the discussion is therefore on the development of inter cultural competences for university people supported by sustainable international management practices **Student Recruitment Agents in International Higher Education** Pii-Tuulia Nikula, Vincenzo Raimo, Eddie West, 2023-05-30 With a focus on the growing number of institutions employing commercial agents to support international student recruitment Student Recruitment Agents in International Higher Education provides an evidence based exploration of this phenomenon and will increase the reader s understanding of the multiple dimensions of agent engagement its contradictions and complexities This book explores who and what these education agents are what students and higher education institutions can expect from a good agent how bad agents can be identified and avoided and what we learn from the reasons for the development of these agents in the first place Offering theoretical perspectives with practical applications this volume features contributions from academics and scholar practitioners laying out fresh perspectives and insights on topics such as process transparency developing agent policy and procedures and government regulations Providing the ideal reference for students embarking on international study agents higher educational institutions government accreditation agencies researchers and practitioners this insightful book acts as a critical basis for further research and improvements in higher education practice Handbook on Small Nations in the Global Economy D. van den Bulcke, Alain Verbeke, Wenlong Yuan, 2009 These studies of the international competitiveness of small open economies demonstrate the critical importance of foreign direct investment as an engine of economic development multinational enterprises are the key drivers of international competitiveness Alan M Rugman University of Reading UK Globalization has made every country small The global economic crisis has made sure that every country has increasingly realised that it is open and vulnerable as well This volume is both timely and relevant Small country studies should become mainstream for scholars in business economics and politics Rob van Tulder RSM Erasmus University the Netherlands This book provides a fresh and clear eyed view of the

relationship between multinationals and location advantages of countries It is one of the first attempts to build a constructive bridge between the theory of international business and the outstanding contribution of Michael Porter about the drivers of competitiveness The authors address crucial issues demanding the attention of teachers researchers practitioners and political leaders Philippe Gugler University of Fribourg Switzerland This unique extensive Handbook illustrates that multinational enterprises can contribute substantially to the competitive advantage of small countries It advances the notion that small nations increasingly need to rely on both home grown and foreign multinational enterprises to achieve domestic economic success in industries characterized by international competition The expert contributors explore the roles of firms in a range of small successful open economies driven by such multinational enterprises across the globe They juxtapose country data sets against Professor Michael Porter's paradigm of single diamond components and show that these single diamond components reflect merely a set of initial conditions which can be improved upon through both inward and outward direct investment Concluding that multinational enterprises create resource linkages between the home and host environments in which they operate this Handbook proves to be a fascinating read for academics students and researchers with an interest in business and management economics and international economics
