Contemporary Approaches to Neuropsychological Assessment Gerald Goldstein, Theresa M. Incagnoli, 2013-06-29

This volume reflects in part an update of Clinical Application of Neuropsychological Test Batteries edited by Theresa Incagnoli Gerald Goldstein and Charles Golden some 10 years ago While the initial concept of the present editors involved doing a straightforward update of each chapter it soon became apparent that the field of clinical neuropsychology had changed so dramatically and rapidly that substantial changes in the outline had to be made It was our view that sufficient interest remained in the standard comprehensive neuropsychological test batteries to make an update worthwhile We asked four senior people to take on this assignment James Moses Jr and Arnold Purisch in the case of the Luria Nebraska Battery and James Reed and Homer Reed for the Halstead Reitan Battery These individuals all have long term associations with these procedures and can be viewed as pioneers in their development However it also seemed to us that there was an increasing interest in the psychometric aspects of the standard procedures and in assessment issues related to the relative merits of using standard or individualized assessment strategies Thus we have chapters by Elbert Russell and Gerald Goldstein that provide discussions of these current methodological and clinical issues During the past 10 years the cognitive revolution has made a strong impact on neuropsychology The interest of cognitive psychologists in brain function has increased dramatically and we now have an active field of cognitive neuropsychology something that was only beginning 10 years ago

Understanding Eyewitness Memory Sean M. Lane, Kate A. Houston, 2021-05-25 An essential overview of how perception and memory affect eyewitness testimony In 1981 sixteen year old Michael Williams was convicted on charges of aggravated rape based on the victim's eyewitness testimony No other evidence was found linking him to the attack After nearly twenty four years Williams was released after three separate DNA analyses proved his innocence The victim still maintains that Williams was the culprit This heartbreaking case is but one example of eyewitness error In Understanding Eyewitness Memory Sean M Lane and Kate A Houston delve into the science of eyewitness memory They examine a number of important topics from basic research on perception and memory to the implications of this research on the quality and accuracy of eyewitness evidence The volume answers questions such as How do we remember and describe people we've encountered What is the nature of false and genuine memories How do emotional arousal and stress affect what we remember Understanding Eyewitness Memory offers a brilliant overview of how memory and psychology affect eyewitness testimony where quality and accuracy can mean the difference between wrongful imprisonment and true justice Mild Cognitive Impairment Ronald C. Petersen, 2003-01-09 What are the boundary zones between normal aging and Alzheimer's disease AD Are many elderly people whom we regard as normal actually in the early stages of AD Alzheimer's disease does

not develop overnight the early phases may last for years or even decades Recently clinical investigators have identified a transitional condition between normal aging and very early Alzheimer s disease that they have called mild cognitive impairment or MCI This term typically refers to memory impairment beyond what one would expect in individuals of a given age whose other abilities to function in daily life are well preserved Persons who meet the criteria for mild cognitive impairment have an increased risk of progressing to Alzheimer s disease in the near future Though many questions about this condition and its underlying neuropathology remain open full clinical trials are currently underway worldwide aimed at preventing the progression from MCI to Alzheimer s disease This book addresses the spectrum of issues involved in mild cognitive impairment and includes chapters on clinical studies neuropsychology neuroimaging neuropathology biological markers diagnostic approaches and treatment It is intended for clinicians researchers and students interested in aging and cognition among them neurologists psychiatrists geriatricians clinical psychologists and neuropsychologists
