Introducing the Effective Mass of Activated Complex and the Discussion on the Wave Function of this Instanton Petr Ptáček, Tomáš Opravil, František Šoukal, 2018-07-18 Heterogeneous kinetics plays an important role in many scientific disciplines and industrial branches such as physical chemistry materials science chemical industry ceramic industry etc Although many excellent books on theories and methods can be found the aim of this book is to provide an unconventional insight into the heterogeneous kinetics and properties of the activated complex The introduction of the effective mass of this instanton enables to calculate many other properties such as the most probable speed of activated complex the momentum the energetic density the mass flux etc and to define two quantum numbers of activated state i e the activation energy and the

momentum The monograph is organized into three chapters The first of them deals with a short historical background which introduces the beginning of chemical kinetics in the historical context The second chapter is dedicated to the transition state theory and the third one explains the concept of effective mass and effective rate of activated state as well as other properties of activated complex

The Healthy Indoor Environment Philomena M. Bluysen, 2013-10-30 Despite policy directives standards and guidelines indoor environmental quality is still poor in many cases The Healthy Indoor Environment winner of the 2016 IDEC Book Award aims to help architects building engineers and anyone concerned with the wellbeing of building occupants to better understand the effects of spending time in buildings on health and comfort In three clear parts dedicated to mechanisms assessment and analysis the book looks at different indoor stressors and their effects on wellbeing in a variety of scenarios with a range of tools and methods The book supports a more holistic way of evaluating indoor environments and argues that a clear understanding of how the human body and mind receive perceive and respond to indoor conditions is needed At the national European and worldwide level it is acknowledged that a healthy and comfortable indoor environment is important both for the quality of life now and in the future and for the creation of truly sustainable buildings Moreover current methods of risk assessment are no longer adequate a different view on indoor environment is required Highly illustrated and full of practical examples the book makes recommendations for future procedures for investigating indoor environmental quality based on an interdisciplinary understanding of the mechanisms of responses to stressors It forms the basis for the development of an integrated approach towards assessment of indoor environmental quality

The Tao of Cosmos Zhen G. Ma,2024-07-23 Connects the philosophy of the I Ching with key recent advances in cosmology such as the Big Bang theory Roger Penrose s cyclic conformal cosmology and his and Stuart Hameroff s cosmic quantum brain dynamics Explains the Taoist cosmology of Heaven Humanity Oneness in the context of Teilhard de Chardin s evolutionism Thomas Berry s cosmogenetic trinity and Brian Swimme s 12 cosmological powers Examines the holographic unity of Heaven Earth and Humankind at microcosmic mesocosmic and macrocosmic scales Is the universe inert and empty or is it in some way responsive to consciousness Breathing new life into a question that has perplexed philosophers since ancient times and scientists for the last century physicist Zhen G Ma Ph D offers a quantitative theory of everything that beautifully integrates ancient I Ching philosophy Eastern Taoism modern cosmology and the quantum brain dynamics of consciousness Sharing insights from his years of research on space physics and black hole spacetime complemented by studies in quantum brain dynamics and cosmological powers with Brian Swimme at the California Institute of Integral Studies Ma explains how his integrated theory draws primarily on two key paradigms in the philosophy of cosmology and consciousness Swimme s cosmic creation story of the universe as a green dragon and Roger Penrose and Stuart Hameroff s cosmic consciousness Extending these theories further Ma shows how they harmonize not only with the ancient Eastern philosophy of the oneness of heaven and humanity but also with a holographic cosmic principle that connects the quantum plasma brain with the universe and earth with heaven He then looks at this holographic unity in the cyclic process of birth growth decay and death and shows how it resonates with Einstein Friedmann s cosmological dynamics and Hawking Penrose s quantum gravity model Demonstrating a quantitative paradigm of everything Ma shows how humanity is inextricably and holistically blended into the cosmic fabric of the universe
