Financial Innovation and Engineering in Islamic Finance Samir Alamad,2017-04-13 This book provides two important contributions to existing theories in the financial innovation literature First it extends the existing literature of innovation orientation to a completely new field and construct that is based on a religious imperative as a framework within which financial innovation is constrained It explains how an innovation orientation in IFIs can be directed within religious rules which indicates that innovation orientation in IFIs is a learning philosophy Second the book introduces and examines the plasticity of Shariah as a shared boundary object and its dynamic role in managing tension and conflicting values in the financial innovation process Furthermore building on the empirical results the study illustrates the insights that each theoretical lens affords into practices of collaboration and develops a novel analytical framework for understanding religious orientation towards financial innovation This practical contribution of the developed framework could form the basis for a standardised framework for the Islamic finance industry The book concludes by noting the policy and managerial implications of its findings and provides directions for further research

A Tale of Two Crises Seetharam Kallidaikurichi,2013-03-05 Some analysts looked at the 1997 98 East Asian crisis not as one crisis but as a combination of crises beginning with a crisis of confidence and evolving into a currency crisis a financial crisis an economic crisis a social crisis and a political crisis This book is a multidisciplinary study of financial crises in particular the Asian crisis of 1997 and the more recent global financial crisis of 2008 Looking at financial crises not as one crisis but as a combination of crises beginning with a crisis of confidence this study steps out of the traditional mould and examines financial crises from novel perspectives The book highlights that since the origin of a financial crisis is a

confidence crisis either in the whole economy or a particular sector the Asian and recent global crises could have backward and forward linkages to political regimes and institutions culture and tradition the role of the media society and societal evolution and development processes of regulatory regimes Through contributions by authors in fields ranging from sociology and political science media and Islamic banking to law and regulation this study adopts a broad framework for understanding financial crises and sheds light on the interwoven and complex structures and often overlooked aspects which contribute to the holistic understanding of this topic

Sticky Power Daniel Haberly, Dariusz Wójcik, 2022-05-02 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Although modern civilization revolves around money the nature of money is paradoxical It is nothing more than a representation of and medium for decentralized networks of social trust but its production is controlled by highly centralized networks of firms places and governments and there is never enough of it to go around Moreover given that the creation of money as credit is based on expectations money is at its heart an instrument for human agency to change the future However the financial systems that produce money are deeply rooted in the past and perpetuate themselves through history *Sticky Power* seeks to deepen our understanding of the paradox of money by introducing a novel conceptual lens Global Financial Networks to cast new light on the geography history politics and sociology of finance from the Middle Ages to the global financial crisis and beyond It shows that the power of finance is inherently sticky apparently new innovations such as offshore finance actually date back centuries and global financial networks more broadly have adapted to the rise and fall of empires and the development of new technologies while changing surprisingly little in their basic character or at most changing very slowly Haberly and Wójcik argue that a recognition of the mechanics of this durability calls for a new approach to reforming finance one less reactively focused on regulation and more proactively focused on building new institutional systems with a long term sticky power of their own
