Financial Ratios For Executives Springer:

Financial Ratios for Executives Michael Rist, Albert J. Pizzica, PENHAGENCO LLC, 2014-11-26 Financial Ratios for Executives is written specifically with today's global executive in mind. It makes financial ratios easy to understand and use effectively. This short book will prove invaluable to both financial and non-financial executives looking for easy, intuitive methods to assess corporate health and assist in strategic decision making. Financial Ratios for Executives contains over 100 financial ratios and other useful calculations. It includes ratios that are commonly used such as return on investment (ROI), return on assets (ROA), return on equity (ROE), economic value added (EVA), and debt to equity ratio, just to name a few. It also includes many less well-known yet powerful ratios that can provide unparalleled insight into operations, financial management, sales and marketing efforts, and overall performance among other areas. Using realistic financial and operational data from two fictional companies, the explanation of each ratio includes the type of ratio, formula for calculating the ratio, description of the ratio, example based on ABC Company or XYZ Company, and additional comments or insights. In addition to the section on financial ratios, financial experts Michael Rist and Albert Pizzica have included a section on capital budgeting, an understanding of which is essential for both the financial and non-financial executives before they take part in an annual budget meeting or any other business meeting where capital allocation is discussed. It includes the most important tools of finance such as net present value (NPV), internal rate of return (IRR), payback method, and total cost of ownership. Who gets ahead in the business world? Those who understand the numbers. It's as simple as that. Financial Ratios for Executives is for those who want to understand how to use financial data to support their initiatives, solve persistent problems, uncover opportunities, bolster company health, and shine in corporate meetings. *Engineering Management* C. M. Executive Playbook Sean Geehan, 2011-08-09 The first book completely focused on successfully running B2B which is very different from B2C The fate of a B2B lies in the hands of a few individuals so what ultimately determines if a company thrives or even survives is how these key relationships are targeted structured and managed Over 30 percent of all B2B product development marketing and other discretionary dollars are wasted When the realities of B2B marketplace are not integrated into a company's SOP it is more likely that the company is wasting money as well as the employees time and efforts If the budget and plans aren't structured for B2B specifically they won't move the meter But there is good news there is a corresponding equal amount of potential revenue growth and prosperity The leading B2B companies dramatically build their top and bottom lines when leaders realize that success undeniably and unquestionably resides with how they engage with their customers and how that will drive their internal alignment and operations What is it that they are doing differently than their competition and others in their industry that drive revenue growth deliver predictable earnings retain and grow customers and develop new offerings that customers will not only buy but for which they will pay premiums
