Financial Accounting An Introduction To Concepts Methods And Uses 13th Edition:

Why They Do It Eugene Soltes, 2016-10-11 What drives wealthy and powerful people to white collar crime Fascinating portraits Washington Post of the dark side of the business world From the financial fraudsters of Enron to the embezzlers at Tyco to the insider traders at McKinsey to the Ponzi schemer Bernie Madoff the failings of corporate titans are regular fixtures in the news In Why They Do It Harvard Business School professor Eugene Soltes draws from extensive personal interaction and correspondence with nearly fifty former executives as well as the latest research in psychology criminology and economics to investigate how once celebrated executives become white collar criminals White collar criminals are not merely driven by excessive greed or hubris nor do they usually carefully calculate costs and benefits before breaking the law Instead Soltes shows that most of the executives who committed crimes made decisions the way we all do on the basis of their intuitions and gut feelings The trouble is that these gut feelings are often poorly suited for the modern business world where leaders are increasingly distanced from the consequences of their decisions and the individuals they impact The extraordinary costs of corporate misconduct are clear to its victims Yet never before have we been able to peer so deeply into the minds of the many prominent perpetrators of white collar crime With the increasing globalization of business threatening us with even more devastating corporate misconduct the lessons Soltes draws in Why They Do It are needed more urgently than ever

Ungewisse Verbindlichkeiten in der internationalen Rechnungslegung Marc Piske, 2013-03-08 Marc Piske zeigt dass die IAS und US GAAP aufgrund vieler Unzulänglichkeiten bei der Passivierung und Bewertung von ungewissen Verbindlichkeiten weitgehend zweckinadquat sind anders als das deutsche Bilanzrecht das wohlverstanden sowohl der Informationsfunktion wie auch der nachprüfbaren Gewinnermittlung gerecht wird The Whole Elephant

Mr. Timothy Irwin, 2015-12-10 Although the budget deficit is much discussed in political debate and economic research there is no agreement on how it should be measured There are at least four options which can be called the cash deficit the financial deficit the full accrual deficit and the comprehensive deficit Each is informative but each has problems of relevance or reliability Some are more vulnerable to manipulation involving assets and liabilities that are unrecognized in the underlying accounting others to manipulation involving the mismeasurement of recognized assets and liabilities Governments should publish all four in a form that reveals their interrelationships

Global Patent Protection and Enforcement of In Vitro Diagnostic Inventions Lisa Mueller, 2019-11-01. Like all inventors, developers of in vitro medical diagnostic tests depend on patent protection that is enforceable against alleged infringers and ensures royalties and other payments. Due to recent United States (US) court decisions that have made the patentability of such tests untenable in the US, there is an expectation that patent applications for in vitro diagnostic inventions will increase in commercially important countries that provide broader protection. Accordingly, this book thoroughly describes the patentability requirements and enforcement challenges faced by in vitro diagnostic inventions in nine major worldwide markets, providing practical tips on how to overcome these challenges and build a globally enforceable patent portfolio for such inventions. For each of nine jurisdictions—Australia, Canada, China, the European Union, India, Japan, Russia, South Africa, and the US—an author knowledgeable in the patent law of his or her country examines such elements as the following: subject matter eligibility, specific patentability hurdles, recent and relevant cases, specific issues relating to enforcement and exceptions to infringement. Specific examples of types of claims, both immunohistochemistry and molecular in vitro diagnostics, are provided along with tips for drafting and prosecuting applications and best practices for forestalling rejections based on subject matter eligibility and prior art. This book is the first to provide a comprehensive global examination of the patentability of in vitro diagnostic tests. The editor, a patent attorney globally known for her work with the pharmaceutical industry, has assembled a compendium of international expertise that will prove indispensable to patent practitioners, prosecution as well as litigation, corporate research teams, pharmaceutical and other companies, and academics throughout the world.
