the highest standards with a positive perception of their function as agents of dissemination and who are committed to the good not only of their firm but also of society in general. Particularly in today's environment of significant movements of goods the highest priority is accorded to the social and labor policy elements of company management. For its part the State must create advantageous framework conditions and promote the willingness to accept risk that is fundamental to the entrepreneurial spirit. A social constitutional state with a liberal social structure has always been and remains the prime concern of democratically spirited forces everywhere. When managers live up to the expectations with which they are entrusted they lend the social market economy often misunderstood and sometimes even misused a new luster. This in turn fulfils the hopes and expectations of those Europeans for whom the development of pan-European structures stands for the recovery from post-communist stagnation.

Financial Management Practices P.K. Jain, Shveta Singh, Surendra Singh Yadav, 2013-03-26 Financial management practices are likely to have a marked effect on the financial performance of a corporate enterprise. Therefore sound financial decisions/practices can contribute towards meeting the desired objective of having profitable operations. This subject assumes paramount significance in view of the present dynamic and turbulent business environment which has produced more intense competition and smaller profit margins across the world. In this context the financial management practices of the corporates in India, a country with a vast potential for economic growth, can offer valuable insights. The present study explores whether there has been a major change in the financial performance measured in terms of profitability and financial policies/decisions of the sample companies over a fixed period 2000-2001 to 2010-2011 with a special focus on pre and post recession analysis. It delves deeper into current research areas such as zero working capital, real options in capital budgeting, pecking order in capital structures and clause 49 as reflected in the financial management decisions of sample companies and provides a broader perspective by identifying trends, if any, in certain aspects of financial decision making over the past two decades. A comprehensive study covering all the major aspects of financial management practices also contains an inter-sectoral study among the sample companies and develops an index of professionalism in financial management based on the practices of the sample companies. The book is primarily targeted at teachers, students of finance management, commerce, accounting and related professional disciplines/fields. Practitioners/professionals will find it an invaluable text that helps guide them to better decision making.
