Schuelka,Suzanne Carrington,2021-12-16 *Global Directions in Inclusive Education* pushes the conceptual boundaries of inclusive education and explores new ways to research and envision inclusion and diversity in education for all children This pioneering book problematizes inclusive education as a global currency as another form of deficit thinking and as a universal application The expert team of international contributors argue that much of the field of inclusive education needs a reinvigoration of new ideas critical introspection and ways of knowing that can overcome the well worn deficit paths of inclusive education study namely barriers to inclusion teacher attitudes policy practice gaps lack of resources and lack of teacher training Seeking diverse ways forward that represent new visions and innovations from around the world this text features voices and ideas from both early career and established scholars to enliven debate and promote a more positive and productive dialogue *Global Directions in Inclusive Education* is ideal for students researchers and scholars of inclusive education development practitioners seeking new ideas and practitioners seeking to gain a deeper and more global understanding of inclusive education both in theory and in practice *Social Justice and Transformative Learning* Sandra M. Tomlinson-Clarke,Darren L. Clarke,2016-03-10 The similarities between the United States and South Africa with respect to race power oppression and economic inequities are striking and a better understanding of these parallels can provide educational gains for students and educators in both countries Through shared experiences and perspectives this volume presents scholarly work from U S and South African scholars that advance educational practice in support of social justice and transformative learning It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice and a deeper understanding of the factors influencing personal national and global identity **Life Orientation Gr10 T/g** , *English a Changing Medium for Education* Constant Leung,Brian V. Street,2012-07-25 In this volume a range of authors from different international contexts argue that the notion of communicative competence in English hitherto largely referenced to metropolitan native speaker norms has to be expanded to take account of diverse contexts of use for a variety of purposes It also discusses the popular belief that language and literacy should simply be regarded as a technical skill which confers universal benefits and that it should be replaced with a social practice view that recognises situated variations and diversity This volume we believe provides a reference point for extended research and practice in these areas that will be of interest to wide range of people engaged in language and literacy education *Research in Education* ,1973 **Teaching Social Studies** James Litle,Gerald L. Wilson, Virginia Wilson,1993-01-30 Just as society has changed dramatically over the last century so have the social sciences

This valuable reference chronicles the historical development of social studies as a discipline in elementary and secondary schools. It also assesses the current state of teaching and research in the social sciences and history at the pre-college level and it charts new directions for the future of social studies in secondary and elementary schools. By tracing the historical development of social studies, the reference indicates how social studies has constantly been redefined to meet the changing needs and expectations of society. At the same time, the historical context provided by the authors sheds new light on the current state of social studies in the curriculum and the development of social studies in the future. The book begins with introductory chapters that overview themes and issues common to all areas of history and the social sciences. The chapters that follow summarize and assess the developments and trends of particular fields commonly thought to constitute social studies. The volume concludes with chapters on broad topics including the place of religion in the social studies curriculum, the role of writing in history and the social sciences, and the professional training of social studies teachers. Each chapter begins with a section of reflections on the development of the discipline, followed by a section on current issues and trends, followed by a final section of projections for the future of the discipline. The result is a comprehensive overview of the past, present, and future of social studies in elementary and secondary schools and an indispensable reference for educators, historians, and social scientists.
