sciences in a way that may bring Asimov's dream closer to reality      The Digital Rights Delusion Andrea Monti, 2023-03-31  
This book examines the ever increasing impact of technology on our lives and explores a range of legal and constitutional questions that this raises. It considers the extent to which concepts such as cyberspace and digital rights advance or undermine our understanding of this development and proposes a number of novel approaches to the effective protection of our rights in this rapidly evolving environment. Finally, it shows how the abuse of the adjective digital has demoted legal rights into subjective and individual claims. The work will be of particular interest to scholars of privacy, artificial intelligence and free speech as well as policymakers and the general reader      **Green Planets** Gerry Canavan, Kim Stanley Robinson, 2014-04-15  
Contemporary visions of the future have been shaped by hopes and fears about the effects of human technology and global capitalism on the natural world. In an era of climate change, mass extinction and oil shortage, such visions have become increasingly catastrophic, even apocalyptic. Exploring the close relationship between science fiction, ecology and environmentalism, the essays in *Green Planets* consider how science fiction writers have been working through this crisis. Beginning with H. G. Wells and passing through major twentieth-century writers like Ursula K. Le Guin, Stanislaw Lem and Thomas Disch to contemporary authors like Margaret Atwood, China Miéville and Paolo Bacigalupi, as well as recent blockbuster films like *Avatar* and *District 9*, the essays in *Green Planets* consider the important place for science fiction in a culture that now seems to have a very uncertain future. The book includes an extended interview with Kim Stanley Robinson and an annotated list for further exploration of ecological SF and related works of fiction, nonfiction, films, television, comics, children's cartoons, anime, video games, music and more. Contributors include Christina Alt, Brent Bellamy, Sabine Hühner, Adeline Johns, Putra Melody, Jue Rob, Latham, Andrew Milner, Timothy Morton, Eric C. Otto, Michael Page, Christopher Palmer, Gib Prettyman, Elzette Steenkamp, Imre Szeman      *Mindscapes, the Geographies of Imagined Worlds* George Edgar Slusser, 1989  
Eighteen essays plus four examples from the ninth annual J. Lloyd Eaton Conference on Science Fiction and Fantasy Literature at the University of California, Riverside. The concept of mindscape, Slusser and Rabkin explain, allows critics to focus on a single fundamental problem: the constant need for a relation between mind and some being external to mind. The essayists are Poul Anderson, Wendy Doniger, O. Flaherty, Ronald J. Heckelman, David Brin, Frank McConnell, George E. Slusser, James Romm, Jack G. Voller, Peter Fitting, Michael R. Collings, Pascal J. Thomas, Reinhart, Lutz, Joseph D. Miller, Gary Westfahl, Bill Lee, Max P. Belin, William Lomax and Donald M. Hassler. The book concludes with four authors discussing examples of mindscape. The participants are Jean-Pierre Barricelli, Gregory Benford, Gary Kern and David N. Samuelson  
*Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen*, 1998      *Cosmic Apprentice* Dorion Sagan, 2013-05-01  
In the pursuit of knowledge, Dorion Sagan argues in this dazzlingly eclectic, rigorously crafted and deliciously witty collection of essays, scientific authoritarianism and philosophical obscurantism are equally formidable obstacles to discovery. As science has become more specialized and more costly, its

questing spirit has been constrained by dogma And philosophy perhaps the discipline best placed to question orthodoxy has retreated behind dense theoretical language and arcane topics of learning Guided by a capacious democratic view of science inspired by the examples set by his late parents Carl Sagan who popularized the study of the cosmos and Lynn Margulis an evolutionary biologist who repeatedly clashed with the scientific establishment Sagan draws on classical and contemporary philosophy to intervene provocatively in often charged debates on thermodynamics linear and nonlinear time purpose ethics the links between language and psychedelic drugs the search for extraterrestrial intelligence and the occupation of the human body by microbial others Informed by a countercultural sensibility a deep engagement with speculative thought and a hardheaded scientific skepticism he advances controversial positions on such seemingly sacrosanct subjects as evolution and entropy At the same time he creatively considers a wide range of thinkers from Socrates to Bataille and Descartes to von Uexküll to reflect on sex biopolitics and the free will of Kermit the Frog Refreshingly nonconformist and polemically incisive Cosmic Apprentice challenges readers to reject both dogma and cliché and instead recover the intellectual spirit of adventure that should and can once again animate both science and philosophy      **Library Media Connection** ,1986
