**Faster** James Gleick, 1999 Synchronize your watches We have reached the epoch of the nanosecond This is the heyday of speed If one quality defines our modern technocratic age it is acceleration We are making haste Our computers our movies our sex lives our prayers they all run faster now than ever before And the more we fill our lives with time saving devices and time saving strategies the more rushed we feel In **Faster** James Gleick explores nothing less than the human condition at the turn of the millennium He shines a light of enterprising and analytical reporting as well as sly wit on the newest paradoxes of time His journey takes us through the bunkers and trenches of a war we barely knew we were fighting to the atomic clocks of the Directorate of Time to the waiting rooms that focus our impatience to the film production studios that test the high speed limits of our perception to the air traffic command centers that give time pressure new meaning We have become a quick reflexed multitasking channel flipping fast forwarding species We don't completely understand it and we're not altogether happy about it **Faster** is a mirror held up to our times and a mordant reminder of why some things take time

simultaneous experiences of speed and waiting and asks questions about the ownership of time In doing so it scrutinizes relations between time and quality and points to the impact of time on how and what we can know revealing how these temporal regimes create deep asynchronicities and fragmentations and perpetuate injustices and exclusions Arguing for a more mindful approach to research Felt advocates for rethinking academia through the lens of time emphasizing the need for temporal care work in order to achieve sustainable and responsible change Aimed at researchers academic leaders and policymakers the book offers a compelling vision for a more responsive long term and equitable academic future one that challenges neoliberal models that prioritise speed competitiveness and efficiency **High-speed Society** Hartmut

Rosa,2010-11-01 Everywhere life seems to be speeding up we talk of fast food and speed dating But what does the phenomenon of social acceleration really entail and how new is it While much has been written about our high speed society in the popular media serious academic analysis has lagged behind and what literature there is comes more from Europe than from America This collection of essays is a first step toward exposing readers on this side of the Atlantic to the importance of this phenomenon and toward developing some preliminary conceptual categories for better understanding it Among the major questions the volume addresses are these Is acceleration occurring across all sectors of society and all dimensions of life or is it affecting some more than others Where is life not speeding up and what results from this disparity What are the fundamental causes of acceleration as well as its consequences for everyday experience How does it affect our political and legal institutions How much speed can we tolerate The volume tackles these questions in three sections Part 1 offers a selection of astute early analyses of acceleration as experienced in the late nineteenth and early twentieth centuries Part 2 samples recent attempts at analyzing social acceleration including translations of the work of leading European thinkers Part 3 explores acceleration's political implications Verbal Ability And Reading Comprehension For The Cat And Other Mba Entrance Examinations (With Cd) Time,2010-09

*The Information Society* Robert Hassan,2013-04-25 What are we to make of the information society Many prominent theorists have argued it to be the most profound and comprehensive transformation of economy culture and politics since the rise of the industrial way of life in the 18th century Some saw its arrival in a positive light where the dreams of democracy of connectivity and efficiency constituted a break with the old ways But other thinkers viewed it more in terms of the recurrent nightmare of capitalism where the processes of exploitation commodification and alienation are given much freer rein than ever before In this book Robert Hassan a prominent theorist in new media and its effects analyses and critically appraises these positions and forms them into a coherent narrative to illuminate the phenomenon Surveying the works of major information society theorists from Daniel Bell to Nicholas Negroponte and from Vincent Mosco to Manuel Castells *The Information Society* is an invaluable resource for understanding the nature of the information society as well as the meta processes of neoliberal globalisation and the revolution in information technologies that made it possible *Die Neuerfindung des Erfolgs* Arianna Huffington,2014-09-22 Erfolg ist
