## Analyzing Financial Statements

### ANSWERS TO QUESTIONS

1. Published financial statements are designed primarily to meet the needs of external decision makers, including present and potential owners, investment analysts, and creditors.
2. The three factors are: Economy-wide factors, industry factors, and individual company factors.
3. Under a product differentiation strategy, companies offer products with unique features, which typically allows them to charge higher prices. Under a cost differentiation strategy, companies focus on minimizing operating costs, which typically allows them to offer products or services at a lower price.
4. The two general methods are comparing across time and comparing across companies. When comparing across time, analysts evaluate a company and how it has changed over several years. When comparing across companies, analysts compare a firm to its competitors at a point in time.
5. Component percentages express each item on a financial statement as a percentage of a single base amount. The base amount on the income statement is net sales. To compute component percentages on the income statement each amount reported is divided by net sales. The base amount on the balance sheet is total assets. To compute component percentages on the balance sheet each amount is divided by total assets. Component percentages are useful because they reveal relative relationships that are not readily apparent from absolute dollar amounts.
6. Ratios express the proportionate relationship between two amounts. Ratio analysis is useful because it may reveal critical relationships that are not readily apparent from absolute dollar amounts.
7. Profitability ratios focus on net income and how it compares to other amounts reported on the financial statements. Return on equity, return on assets, financial leverage percentage, net profit margin, earnings per share, and earnings quality are examples discussed in Chapter 13. Formulas for these ratios are provided in Exhibit 13.3.
8. Turnover ratios focus on capturing how efficiently a company uses its assets. Total asset turnover, fixed asset turnover, receivables turnover, and

**Time-Driven Activity-Based Costing** Robert S. Kaplan, Steven R. Anderson, 2007-02-22 In the classroom ABC looks like a great way to manage a company's resources But many executives who have tried to implement ABC on a large scale in their organizations have found the approach limiting and frustrating Why The employee surveys that companies used to estimate resources required for business activities proved too time consuming expensive and irritating to employees This book shows you how to implement time driven activity based costing TDABC an easier and more powerful way to implement ABC You can now estimate directly the resource demands imposed by each business transaction product or customer The payoff You spend less time and money obtaining and maintaining TDABC data and more time addressing problems that TDABC reveals such as inefficient processes unprofitable products and customers and excess capacity The authors also show how to use TDABC to link strategic planning to operational budgeting to enhance the due diligence process for mergers and acquisitions and to support continuous improvement activities such as lean management and benchmarking In presenting their model the authors define the two questions required to build TDABC 1 How much does it cost per time unit to supply resource capacity for each business process 2 How much resource capacity time is required to perform work for a company's many transactions products and customers The book demonstrates how to develop simple valid answers to these two questions Kaplan and Anderson illustrate the TDABC approach with a wealth of case studies in diverse settings based on actual implementations

The UK Financial System M. Buckle, John L. Thompson, 1998 Transforming conflict through social and economic development examines lessons learned from the Northern Ireland and Border Counties conflict transformation process through social and economic development and their consequent impacts and implications for practice and policymaking with a range of functional recommendations produced for other regions emerging from and seeking to transform violent conflict It provides for the first time a comprehensive assessment of the region's transformation activity largely amongst grassroots actors

enabled by a number of specific funding programmes namely the International Fund for Ireland Peace I II and III and INTERREG I II and IIIA These programmes have been responsible for a huge increase in grassroots practice which to date has attracted virtually no academic analysis this book seeks to fill this gap In focusing on the politics of the socioeconomic activities that underpinned the elite negotiations of the peace process key theoretical transformation concepts are firstly explored followed by an examination of the social and economic context of Northern Ireland and the border counties The three programmes and their impacts are then assessed before considering what policy lessons can be learned and what recommendations can be made for practice This is underpinned by a range of semi structured interviews and the author s own experience as a project promoter through these programmes in the border counties for more than a decade The book will be essential reading for students practitioners and policymakers in the fields of peace and conflict studies conflict transformation peacebuilding post agreement reconstruction and the political economy of conflict and those interested in contemporary developments in the Northern Ireland peace process
