Jean-Philippe Robé, 2020-10-05 Globalization is an extraordinary phenomenon affecting virtually everything in our lives And it is imperative that we understand the operation of economic power in a globalized world if we are to address the most challenging issues our world is facing today from climate change to world hunger and poverty This revolutionary work rethinks globalization as a power system feeding from and in competition with the state system Cutting across disciplines of law politics and economics it explores how multinational enterprises morphed into world political organisations with global reach and power but without the corresponding responsibilities In illuminating how the concentration of property rights within corporations has led to the rejection of democracy as an ineffective system of government and to the rise in inequality Rob offers a clear pathway to a fairer and more sustainable power system **Australian National Bibliography**, 1995

Positional Analysis for Sustainable Development Judy Brown, Peter Soderbaum, Malgorzata Dereniowska, 2017-05-18 Climate change biodiversity loss pollution of land and water land use changes lack of equality and other problems at local national and global levels represent a challenge for economics as a social science Mainstream neoclassical economics may be able to contribute to a more sustainable society but it has also played a dominant role in a period where problems have been aggravated A pluralist and democratic view of economics is therefore very much warranted This book presents a multidimensional and ideologically more open view of economics understanding economics in multidimensional terms is in accordance with the 17 sustainable development goals recognized by nations at the UN level in 2015 Accordingly approaches to decision making and accounting at the national and business levels have to be reconsidered Neoclassical Cost Benefit Analysis CBA with focus on the monetary dimension and an assumed consensus about a specific market ideology to be applied is not compatible with democratic societies where citizen and actors in other roles normally differ with respect to ideological orientation Environmental Impact Statements and Multi Criteria methods are used to some extent to broaden approaches to decision making In this book Positional Analysis is advocated as a multidimensional and ideologically open approach Positional Analysis is based on a political economic conceptual framework as part of ecological economics that differs from neoclassical ideas of individuals firms and markets And since approaches to decision making and to accounting are closely connected a new theoretical perspective in economics similarly raises issues of how national and business accounting can be opened up to meet present demands among various actors in society This perspective raises also numerous ethical questions at the science and policy interface that need to be properly addressed for sustainability decision making *Medical Books and Serials in Print*, 1984 **Books in Print**, 1993-09 V 1 Authors A D v 2 Authors E K v 3
